1. DESCRIPTION OF THE BUSINESS

Med Life S.A. ("MedLife" or the "Parent Company" or the "Company") is a joint-stock company incorporated in 1996, in accordance with the laws and regulations of Romania, with its headquarters in Bucharest, 365, Calea Grivitei, with a share capital of RON 33,217,623, with a nominal share value of 0.25 RON.
The Company's activity resides in the performance of healthcare services activities through medical centres with national coverage.

MedLife, together with its subsidiaries ("MedLife Group" or the "Group"), is offering a large range of medical service, with a network of 34 hyperclinics, 64 clinics, 11 hospitals – located in Bucharest, Arad, Sibiu, Brasov, Cluj and Ploiesti, 36 laboratories, 23 pharmacies and 18 dental clinics. The Group has also more than 170 private clinic partners around Romania.

Medlife is the leading private health care services provider in Romania, having a significant market share at a national level.

The ultimate parent of the Group is Med Life SA. In accordance with the provisions of the Law no. 129/2019, the Group has identified the following controlling parties:

The Marcu family:
1. Mr. Mihail Marcu, considering his quality of shareholder of the company, which holds a percentage of 15.0013% of its share capital;
2. Mr. Nicolae Marcu, considering his quality of shareholder of the company, which holds a percentage of 10.4127% of its share capital;
3. Mrs. Mihaela Gabriela Cristescu, considering her quality of shareholder of the company, which holds a percentage of 14.0443% of its share capital.

Considering the family relations between the persons mentioned above, namely the fact that Mr. Mihail Marcu and Mr. Nicolae Marcu are the sons of Mrs. Mihaela Gabriela Cristescu, and the fact that together they own more than 25% of the total share capital of the company, for to pursue the purpose of the law, even if the law refers to the natural person, this expression of the law does not exclude the hypothesis of natural persons acting together, to the extent that it is established that they control the company together and are the final beneficiaries of its activity.

**These companies are subsidiaries in other subsidiaries in the Group and are included in the consolidation as they are controlled by the entities which are subsidiaries of the ultimate parent*

2. ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRSs)

2.1 Changes in accounting policy and disclosures

The accounting policies adopted are consistent with those of the previous financial year except for the following IFRS amendments which have been adopted by the Group/Company as of 1 January 2022:

- **IFRS 3 Business Combinations; IAS 16 Property, Plant and Equipment; IAS 37 Provisions, Contingent Liabilities and Contingent Assets as well as Annual Improvements 2018-2020 (Amendments)**
  The amendments are effective for annual periods beginning on or after 1 January 2022 with earlier application permitted. The IASB has issued narrow-scope amendments to the IFRS Standards as follows:
  - **IFRS 3 Business Combinations (Amendments)** update a reference in IFRS 3 to the previous version of the IASB's Conceptual Framework for Financial Reporting to the current version issued in 2018 without significantly changing the accounting requirements for business combinations.
  - **IAS 16 Property, Plant and Equipment (Amendments)** prohibit a company from deducting from the cost of property, plant and equipment any proceeds from the sale of items produced while bringing the asset to the location and condition necessary for it be capable of operating in the manner intended by management. Instead, a company recognizes such sales proceeds and related cost in profit or loss.
  - **IAS 37 Provisions, Contingent Liabilities and Contingent Assets (Amendments)** specify which costs a company includes in determining the cost of fulfilling a contract for the purpose of assessing whether a contract is onerous. The amendments clarify, the costs that relate directly to a contract to provide goods or services include both incremental costs and an allocation of costs directly related to the contract activities.
  - **Annual Improvements 2018-2020** make minor amendments to **IFRS 1 First-time Adoption of International Financial Reporting Standards**, **IFRS 9 Financial Instruments**, **IAS 41 Agriculture** and the Illustrative Examples accompanying **IFRS 16 Leases**

  The amendments had no impact on the financial statements of Med Life Group.

- **IFRS 16 Leases-Covid 19 Related Rent Concessions beyond 30 June 2021 (Amendment)**
  The Amendment applies to annual reporting periods beginning on or after 1 April 2021, with earlier application permitted, including in financial statements not yet authorized for issue at the date the amendment is issued. In March 2021, the Board amended the conditions of the practical expedient in IFRS 16 that provides relief to lessees from applying the IFRS 16 guidance on lease modifications to rent concessions arising as a direct consequence of the covid-19 pandemic. Following the amendment, the practical expedient now applies to rent concessions for which any reduction in lease payments affects only payments originally due on or before 30 June 2022, provided the other conditions for applying the practical expedient are met.

  The amendments had no impact on the financial statements of the Group.

2.2 Standards issued but not yet effective and not early adopted

- **IFRS 17: Insurance Contracts**
  The standard is effective for annual periods beginning on or after 1 January 2023 with earlier application permitted, provided the entity also applies IFRS 9 Financial Instruments on or before the date it first applies IFRS 17. This is a comprehensive new accounting standard for insurance contracts, covering recognition and measurement, presentation and disclosure. IFRS 17 applies to all types of insurance contracts issued, as well as to certain guarantees and financial instruments with discretional participation contracts. The Group does not issue contracts in scope of IFRS 17; therefore its application does not have an impact on the Group's financial performance, financial position or cash flows.

- **IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2: Disclosure of Accounting policies (Amendments)**
  The Amendments are effective for annual periods beginning on or after January 1, 2023 with earlier application permitted. The amendments provide guidance on the application of materiality judgements to accounting policy disclosures. In particular, the amendments to IAS 1 replace the requirement to disclose 'significant' accounting policies with a requirement to disclose 'material' accounting policies. Also, guidance and illustrative examples are added in the Practice Statement to assist in the application of the materiality concept when making judgements about accounting policy disclosures.

- **IAS 8 Accounting policies, Changes in Accounting Estimates and Errors: Definition of Accounting Estimates (Amendments)**
  The amendments become effective for annual reporting periods beginning on or after January 1, 2023 with earlier application permitted and apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of that period. The amendments introduce a new definition of accounting estimates, defined as monetary amounts in financial statements that are subject to measurement uncertainty, if they do not result from a correction of prior period error. Also, the amendments clarify what changes in accounting estimates are and how these differ from changes in accounting policies and corrections of errors.

- **IAS 12 Income taxes: Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments)**
  The amendments are effective for annual periods beginning on or after January 1, 2023 with earlier application permitted. The amendments narrow the scope of and provide further clarity on the initial recognition exception under IAS 12 and specify how companies should account for deferred tax related to assets and liabilities arising from a single transaction, such as leases and decommissioning obligations. The amendments clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement, having considered the applicable tax law, whether such deductions are attributable for tax purposes to the liability or to the related asset component. Under the amendments, the initial recognition exception does not apply to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. It only applies if the recognition of a lease asset and lease liability (or decommissioning liability and decommissioning asset component) give rise to taxable and deductible temporary differences that are not equal. Management is currently conducting an assessment of the effect of this standard and its amendments.

- **IAS 1 Presentation of Financial Statements: Classification of Liabilities as Current or Non-current (Amendments)**
  The amendments are effective for annual reporting periods beginning on or after January 1, 2024, with earlier application permitted, and will need to be applied retrospectively in accordance with IAS 8. The objective of the amendments is to clarify the principles in IAS 1 for the classification of liabilities as either current or non-current. The amendments clarify the meaning of a right to defer settlement, the requirement for this right to exist at the end of the reporting period, that management intent does not affect current or non-current classification, that options by the counterparty that could result in settlement by the transfer of the entity's own equity instruments do not affect current or non-current classification. Also, the amendments specify that only covenants with which an entity must comply on or before the reporting date will affect a liability's classification. Additional disclosures are also required for non-current liabilities arising from loan arrangements that are subject to covenants to be complied with within twelve months after the reporting period. The amendments have not yet been endorsed by the EU.

- **IFRS 16 Leases: Lease Liability in a Sale and Leaseback (amendments)**
  The amendments are effective for annual reporting periods beginning on or after January 1, 2024, with earlier application permitted. The amendments are intended to improve the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction in IFRS 16, while it does not change the accounting for leases unrelated to sale and leaseback transactions. In particular, the seller-lessee determines 'lease payments' or 'revised lease payments' in such a way that the seller-lessee would not recognise any amount of the gain or loss that relates to the right of use it retains. Applying these requirements does not prevent the seller-lessee from recognizing, in profit or loss, any gain or loss relating to the partial or full termination of a lease. A seller-lessee applies the amendment retrospectively in accordance with IAS 8 to sale and leaseback transactions entered into after the date of initial application, being the beginning of the annual reporting period in which an entity first applied IFRS 16. The amendments have not yet been endorsed by the EU.

- **Amendment in IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture**
  The amendments address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28, in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary. In December 2015 the IASB postponed the effective date of this amendment indefinitely pending the outcome of its research project on the equity method of accounting. The amendments have not yet been endorsed by the EU.

  The Group anticipates that the adoption of these new standards and amendments to the existing standards will have no material impact on the financial statements of the Group in the period of initial application, except for the effects of IAS 12 amendment where the analysis of impact is ongoing as of 31 December 2022

3. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies adopted in the preparation of these consolidated financial statements of the Group are set out below.

3.1 Statement of compliance

These consolidated financial statements have been prepared in compliance with International Financial Reporting Standards (IFRS) as adopted by the European Union (EU).

The accounting policies applied in these financial statements are the same as those applied in the Group's annual consolidated financial statements as at and for the year ended 31 December 2021, except for the adoption of new standards effective as of January 1st 2022.

The financial year corresponds to the calendar year.

3.2 Basis of preparation

The consolidated financial statements of MedLife Group, hereinafter referred to also as "the Group", are presented in RON ("Romanian Leu"), using going concern principles. All values are rounded to the nearest two decimals. The consolidated financial statements have been prepared on the historical cost basis, except for certain items that have been measured at fair value, such as certain non-current assets and financial instruments, as presented in the notes to the financial statements.

The Group maintains the accounting books in accordance with the Regulations on Accounting and Reporting issued by the Ministry of Finance in Romania.

3.3 Going concern

These consolidated financial statements have been prepared on a going concern basis, which assumes the Group will be able to realize its assets and discharge its liabilities in the normal course of business. The Group will continue its activity according to the normal course of business in the foreseeable future without encountering the impossibility of continuing its activity or without the significant decrease of its activity.

For the purposes of assessing liquidity and going concern, the Group has modelled scenarios reflecting suitable assumptions over the next 12–month period that serve to inform the decisions the Group takes regarding future cost savings, cash generation, debt covenants and levels of investment. The Group's financial performance to date in 2023 across all revenue streams has been ahead of the modelled scenarios.
As a result of the recent signing of the refinancing syndicated loan contract, the Group has also undrawn facilities of an amount of EUR 50.7m, which along with other liquidity of the Group, will be used for possible new acquisition opportunities on the market as well as organic development projects.

All measures taken have been decided upon having in mind the Group's strategy to better position itself to all the new market changes, on the long term. As a consequence, the management focused on increasing efficiency of its operations in order to obtain better flexibility over capitalizing market opportunities.

Based on the Group's current financial position and the modelled scenarios, the directors have concluded that the Group has sufficient liquidity to meet all its obligations for at least the twelve months from the date of this report and the directors considered it appropriate to adopt the going concern basis of accounting in preparing the financial statements.

3.4 Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Parent Company (Med Life S.A.) and entities controlled by the Company (its subsidiaries).

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:
- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee
- The ability to use its power over the investee to affect its returns. Generally, there is a presumption that a majority of voting rights results in control.

To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:
- The contractual arrangement(s) with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, non-controlling interest and other components of equity, while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

Profit or loss and each component of OCI are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by other members of the Group.

All intra-group assets and liabilities, equity, income, expenses and cashflows related to transactions between members of the Group are eliminated in full on consolidation. Non-controlling interests in subsidiaries are identified separately from the Group's equity therein.

The interests of non-controlling shareholders are initially measured at the non-controlling interests' proportionate share of the fair value of the acquired company's identifiable net assets.

Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity. Total comprehensive income is attributed to non-controlling interests even if this results in the non-controlling interests having a deficit balance.

3.5 Business combinations

Acquisitions of subsidiaries and businesses are accounted for using the acquisition method. The cost of acquisition is measured at the aggregate of the consideration transferred which is measured at the acquisition date fair value of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquiree.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organised workforce with the necessary skills, knowledge, or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3 are recognized at their fair value at the acquisition date. Acquisition-related costs are expensed as incurred and included in administrative expenses.

Goodwill is initially measured at cost, being the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognized immediately in profit or loss as a bargain purchase gain.

When the consideration transferred by the Group in a business combination includes a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination.

After initial recognition, goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any. Goodwill is tested for impairment annually as at 31 December and when circumstances indicate that the carrying value may be impaired.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognized directly in profit or loss in the consolidated statement of comprehensive income/income statement. An impairment loss recognized for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

3.6 Significant judgements, estimates and assumptions

The preparation of the consolidated financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities as of the date of the balance sheet and revenue and expenses for the period. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

3.6.1. Judgements

In the process of applying the Group's accounting policies, the following judgments were made, particularly with respect to the following:

Determining the lease term of contracts with renewal and termination options – Group as a lessee

MedLife Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised. The Group has lease contracts which include extension and termination options.

The Group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. When determining the lease term to be used for the measurement of the lease, the Group takes into account all the relevant facts and circumstances that create an economic incentive for exercising either the extension or termination option of the lease term.
For leases of buildings, cars and equipment, the following factors are normally the most relevant:

- If there are significant penalty payments to terminate (or not extend), the Group is typically reasonably certain to extend (or not terminate).
- If any leasehold improvements are expected to have a significant remaining value, the Group is typically reasonably certain to extend (or not terminate).
- Otherwise, the Group considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.
- If the Group considers that some of the lease agreement shall be terminated earlier, then the assumption of the tenor shall be reassessed accordingly in order to fairly represent the management's view of the leased asset's impact to the financial statements.
- In case of lease term in relation to indefinite lease contracts the assumption applied was that the lease term will be similar to other contracts signed with the same provider or based on the relevant period beyond which the exercise of any option becomes uncertain.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee.
Please see note 13.

Separate performance obligations for stem cells contracts
In case of revenues obtained from stem cells processing and storage, the Group considers whether there are two promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. Therefore, the Group has identified two separate performance obligations of a multi-component business: the production or processing of stem cells and the storage of cell deposits and allocates the part of the total transaction price corresponding to the storage component on a cost plus basis, with the remaining consideration being allocated to the production and processing component.

Intangible assets with indefinite useful life
The Group's management normally uses judgement to assess whether its intangible assets have a definite or indefinite life and should revise periodically this estimate. Please see note 5.2.

Capitalisation of major inspections or components replacement (including spare parts)
The Group exercises judgement in deciding whether or not there are items that should be capitalised as items of property, plant and equipment. In case of major inspections, the cost can be recognised in the carrying amount of the item of property, plant and equipment, as a replacement, if the recognition criteria are satisfied. Individual components of a significant amount in the total value of an equipment may be replaced, as well as spare parts which in aggregate can become of a significant value that satisfy the recognition criteria. Management performs an assessment whether the replacement increases the performance of the asset or increases its useful life and capitalises the costs incurred if the recognition criteria are met.

Fair value assets and liabilities acquired
The Group has applied the factors and disclosed the quantitative information under IFRS 13 Fair Value Measurement based on the classes of assets and liabilities determined as per IFRS 13.94. As judgement is required to determine the classes of properties, other criteria and aggregation levels for classes of assets may also be appropriate, provided they are based on the risk profile of the assets.

Cash generating units
Management exercises judgement in determining the appropriate level of grouping assets into CGUs, based on the fact that they share significant common infrastructure.

Contingencies
By their nature, contingencies will only be resolved when one or more future events occur or fail to occur. The assessment of contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events. Please see note 31.

Control over subsidiaries
The Group assesses whether or not it has control over the acquired companies based on whether it has the practical ability to direct the relevant activities of the targets, immediately after acquisition. Please see note 27.

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:
• Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
• Exposure, or rights, to variable returns from its involvement with the investee;
• The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:
• The contractual arrangement(s) with the other vote holders of the investee;
• Rights arising from other contractual arrangements;
• The Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

In the recent acquisition of the MNT companies (or Group Neolife, consisting of MNT Healthcare and MNT Asset Management), where 50% of the voting rights were acquired, the Group has established to have control over them. Considering the 50:50 shareholding structure, the Board of Directors structure, where the Group nominates 3 members out of 5 while MNT nominates only 2 members out of 5 and that the ratio will be respected within each period, together with the responsibilities set for decision making process and execution of responsibilities, the Group has concluded that it has power over the investee.

In respect of exposure, or rights, to variable returns from its involvement with MNT, Group Medlife has a 50% share to the returns in the Subsidiary, in line with Articles of Incorporation.

In respect of the ability to use its power over the investee to affect the amount of the investor's returns, according to Articles of Incorporation, the Board of directors (which is controlled by MedLife given the 3-2 ratio) is in charge with the preparation and approval of the budget and business plan, including investment strategy. In 2022, investment in 3 centers was drafted and approved. Reinvestment of profit from the AS IS business together with Banks financing were also approved by the Board of Directors.

3.6.2. Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

Revaluation of Land and Buildings

The Group accounts for land and building using the fair value approach based on market comparative valuations performed by certified ANEVAR professional as per revaluation reports concluded as at 31 December 2022. The valuations conform to International Valuation Standards. Please refer to Note 5 for further information.

Impairment of non-financial assets

The Group bases its impairment calculation on most recent budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of six years. A long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs of disposing of the asset. The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the performance of the assets of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to goodwill and other intangibles with indefinite useful lives recognised by the Group. The key assumptions used to determine the recoverable amount for the different CGUs, including a sensitivity analysis, are disclosed and further explained in notes.

Allowance for expected credit losses of trade receivables and long-term receivables for stem cells processing

The Group always recognises lifetime expected credit losses (ECL) for trade receivables and long-term receivables for stem cells processing. The expected credit losses are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

In determining adjustments for impairment of receivables, management incorporates forward-looking information, exercises professional judgement and uses estimates and assumptions. Estimation of expected credit risk losses involved forecasting future macroeconomic conditions for the next year, compared to the average for 2019-2021 period. More details on the provision matrix can be found in note 7 dedicated to receivables.

In the case of long-term receivables for stem cells processing, the Group recognises an allowance based on the historical collection process for contracts in which the payment is usually due in several years. Please see note 5.4 for more details.

Leases - Estimating the incremental borrowing rate

The Group cannot readily determine the interest rate implicit in its leases. Therefore, it uses the relevant incremental borrowing rates to measure lease liabilities. These incremental borrowing rates were determined taking into consideration factors such as the credit risk, currency in which the lease was denominated and economic environment.

Financing component in contracts concluded with customers - Estimating the discount rate

In order to account for time value of money in contracts concluded with customers for a period longer than one year, where there is a significant financing component, the Group has determined the prevailing interest rate in the market used to discount the transaction price in the contract. This rate is commensurate with the rate that would be reflected in a separate financing transaction between the Group and the customer at contract inception. Please also refer to Note 3.20. for more details on the determination of the discount rate.

Provision for untaken holidays
The Company recognizes a provision for untaken holidays equal to the number of unused leave multiplied by the relevant employee's gross salary at the reporting date.
Please see note 12.

3.7 Foreign currency and translation

Functional and presentation currency
These financial consolidated statements are presented in Romanian Leu ("RON"), which is the currency of the primary economic environment in which almost all of the companies of the Group operate (their "functional currency").

The exchange rates as announced by the National Bank of Romania on 31 December 2022 were RON 4.9474 for EUR 1 (31 December 2021: RON 4.9481 for EUR 1), respectively 1.2354 for HUF 100 (31 December 2021: RON 1.3391 for 100 HUF).
The average exchange rates for the period of 12 months 2022 were 4.9315 RON for 1 EUR (12 months 2021: 4.9204 RON for 1 EUR), respectively 1,2648 RON for 100 HUF (12 months 2021: 1.3733 for 100 HUF).

Translation of foreign currencies
Transactions in foreign currencies are translated to the respective functional currency of the Group at the exchange rate ruling at the time of the transaction. Foreign currency monetary assets and liabilities are retranslated into the functional currency at rates of exchange ruling at the reporting date. The foreign exchange differences arising on these translations are recognised as other financial income/expense in the income statement.

Translation of foreign operations
For the purpose of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated at exchange rates prevailing on the reporting date. Income and expense items are translated at the average exchange rates for the period. Foreign exchange differences arising on translation are recognised in equity through the statement of comprehensive income.

3.8 Property, plant and equipment

Property, plant and equipment under the revaluation model
Land and buildings held for use in the supply of services, or for administrative purposes, are stated in the balance sheet at their fair value, being the revalued amount at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

The value of land and buildings owned presented in these consolidated financial statements is based on the valuation reports which were prepared as of December 31, 2022 by independent valuators certified by ANEVAR. The following steps were taken to estimate the market value of the assets: analysis of assets subject to valuation; the evaluation approaches and the valuation methods applied were based on the category of assets analysed, their location, their characteristics, specific market information; application of appropriate valuation methods for each asset category (i.e. land and buildings) subject to evaluation and estimation of the fair value of the assets analysed at the valuation date, 31 December 2022. The land is not depreciated.

Valuations are performed with sufficient frequency to ensure that the carrying amount of a revalued asset does not differ materially from its fair value.
Accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset.

A revaluation surplus is recorded in OCI and credited to the asset revaluation surplus in equity. However, to the extent that it reverses a revaluation deficit of the same asset previously recognised in profit or loss, the increase is recognised in profit and loss. A revaluation deficit is recognised in the statement of profit or loss, except to the extent that it offsets an existing surplus on the same asset recognised in the asset revaluation surplus.

The Group transfers the revaluation surplus included in equity in respect of an item of property, plant and equipment directly to retained earnings when the asset is derecognised (i.e. retired or disposed of).

Property, plant and equipment using the cost model
Leasehold improvements fall in this category and are stated at cost less accumulated depreciation and accumulated impairment losses. Depreciation is recognised on a straight-line basis over the estimated useful life. The estimated useful life for this type of asset is usually over the life of the lease, considering any potential contract prolongations.

Installations and equipment are also stated at cost, less accumulated depreciation and accumulated impairment losses, if any.

Assets under construction are recorded at cost, less accumulated impairment losses and depreciated once they become available for use.

An item of property, plant and equipment is initially recorded at cost. Cost includes all costs necessary to bring the asset to working condition for its intended use. This include not only its original purchase price, but also costs of site preparation, delivery and handling, installation, related professional fees for architects and engineers, and the estimated cost of dismantling and removing the asset and restoring the site, if the case.
Proceeds from selling items produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management are not deducted from the cost of the item of property, plant and equipment, but recognised in profit or loss.

An entity evaluates under the recognition principle all its property, plant and equipment costs at the time they are incurred. These costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of it.

A condition of continuing to operate an item of property, plant and equipment may be performing regular major inspections for faults regardless of whether parts of the item are replaced.

Costs with capital repairs are included in the carrying amount of the asset when it is probable that future economic benefits above the initially evaluated standard of performance of the existing asset will be transferred to the Group. Capital repairs are depreciated over the remaining useful period of the respective asset.

When each major inspection is performed, its cost is recognised in the carrying amount of the item of property, plant and equipment as a replacement if the recognition criteria are satisfied. Any remaining carrying amount of the cost of the previous inspection (as distinct from physical parts) is derecognised. This occurs regardless of whether the cost of the previous inspection was identified in the transaction in which the item was acquired or constructed. If necessary, the estimated cost of a future similar inspection may be used as an indication of what the cost of the existing inspection component was when the item was acquired or constructed.

Expenses for repairs and maintenance are recognized in the profit or loss account when incurred.

In case of replacements, cost includes the cost of replacing part of the plant or equipment when that cost meets the recognition criteria. If an item of property, plant and equipment consists of several components with different estimated useful lives, the individual significant components are depreciated over their individual useful lives.

Items such as spare parts, stand-by equipment and servicing equipment are recognised as property, plant and equipment when they meet the definition, considering the aggregation and materiality criteria. Otherwise, such items are classified as inventory.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets. Estimated useful lives, residual values and depreciation method are reviewed at the end of each year, and the effects of changes in estimates are recorded prospectively.

The following useful lives are used in the calculation of depreciation:

	Years
Buildings	10 – 50 years
Leasehold improvements	Term of the lease contract
Plant and equipment	3 – 15 years
Fixtures and fittings, including spare parts	3 – 15 years

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss when the asset is derecognised.

3.9 Intangible assets

Intangible assets acquired separately are measured at initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are stated at cost less accumulated amortization and accumulated impairment losses. Amortization is charged on a straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each annual reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

The Group's intangible assets are represented by software licenses, concessions, patents and other intangibles which are amortized straight-line over a period of 3 years.
Additionally, the group has trademarks with indefinite useful lives and customer lists and customers advantages with finite useful lives acquired as part of business combinations that are further presented under Note 5.2.

Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses. Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

De-recognition of intangible assets
An intangible asset is derecognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in profit or loss when the asset is derecognized.

Impairment of non-financial assets
At the end of each reporting period, the Group reviews whether there is an indication that an asset may be impaired.

If any such indication exists, the recoverable amount of the asset is estimated.
Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets that are not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. The Group bases its impairment calculation on most recent budgets and forecast calculations. These budgets and forecast calculations generally cover a period of six years. A long-term growth rate is calculated and applied to project future cash flows after the sixth year.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss, unless the asset is previously revalued with the revaluation taken to OCI, in which case the impairment loss is recognized in OCI up to the amount of any previous revaluation

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. Where an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

3.10 Inventories
Inventories are stated at the lower of cost and net realizable value. Cost of inventories comprises of all the costs incurred in bringing the inventories to their present location and condition. Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale. The group applies FIFO as a costing method.

3.11 Cash and cash equivalents
Cash and cash equivalents are carried in the balance sheet at cost. For the purposes of the statement of cash flows, cash and cash equivalents comprise cash on hand, cash held at call with banks with maturities of three months or less.

3.12 Government grants
Government grants are assistance by government in the form of transfers of resources to an entity in return for past or future compliance with certain conditions relating to the operating activities of the entity. They exclude those forms of government assistance which cannot reasonably have a value placed upon them and transactions with government which cannot be distinguished from the normal trading transactions of the entity.

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with.

The Group has chosen to present grants related to income to be deducted in reporting the related expense.

The Group has elected to present government grants relating to the purchase of property, plant and equipment in the consolidated statement of financial position as deferred income, which is recognised in profit or loss on a systematic and rational basis over the useful life of the asset.

3.13 Financial instruments – initial recognition and subsequent measurement
A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

3.13.1 Financial assets

Initial recognition and classification

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

This classification on initial recognition depends on the Group's business model with regard to the management of financial assets and on the financial asset's contractual cash flows characteristics.

With the exception of trade receivables that do not contain a significant financing component, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component are measured at the transaction price as disclosed in Note 3.20 Revenue from contracts with customers recognition.

Transaction costs that are directly attributable to the acquisition or issue of financial assets (other than financial assets at fair value through profit or loss) are added to or deducted from the fair value of the financial assets, as appropriate, on initial recognition.

A financial asset is measured at amortized cost if both of the following conditions are met:
- the financial asset is held using a business model that aims to hold financial assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely repayments of principal and interest on the principal outstanding.

The Group has only recognised and subsequently measured financial assets at amortised cost.

Subsequent measurement
Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Amortised cost and effective interest method
The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.

For financial assets other than purchased or originated credit-impaired financial assets (i.e. assets that are credit-impaired on initial recognition), the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

Interest income is recognised using the effective interest method for debt instruments measured subsequently at amortised cost. For financial assets other than purchased or originated credit-impaired financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired. For financial sets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset. Interest income is recognised in profit or loss.

The Group's financial assets at amortised cost includes mainly the following: trade receivables and other receivables. These assets are short-term in nature, which is why they are recognised at nominal amounts without discounting.

Derecognition
A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:
- The contractual rights to receive cash flows from the asset have expired or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a passthrough arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership.
When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment
The Group recognises an allowance for expected credit losses (ECLs) for all financial assets not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For trade receivables not containing a financing component, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The Group considers a financial asset in default when contractual payments are over 95 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows, when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

In the case of contracts containing a significant financing component, the Group performs an assessment over the historical collection of these long-term receivables for stem cells processing. Based on the past %, an allowance is determined.

The Group recognises an impairment gain or loss in profit or loss for all trade receivables with a corresponding adjustment to their carrying amount through a loss allowance account.

3.13.2 Equity instruments and financial liabilities

Classification as equity or debt
Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

a) Equity instruments
An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

b) Financial liabilities
Initial recognition and classification
Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, or payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, other long term debt.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. A contingent consideration classified as a financial liability is subsequently remeasured to fair value with the changes in fair value recognised in profit or loss.

Subsequent measurement
For purposes of subsequent measurement, financial liabilities are classified as financial liabilities at amortised cost. The Group has not designated any financial liability as at fair value through profit or loss.

This is the category most relevant to the Group and it includes loans and borrowings. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss. This category generally applies to interest-bearing loans and borrowings.

Derecognition
A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

Offsetting of financial instruments
Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

3.14 Borrowing costs
General and specific borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset is capitalised during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings, pending their expenditure on qualifying assets, is deducted from the borrowing costs eligible for capitalisation.

Other borrowing costs are expensed in the period in which they are incurred.

3.15 Taxation
Income tax expense represents the sum of the tax currently payable and deferred tax.

Current income tax
Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax
Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax base used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences, and deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the balance sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities. Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Current and deferred tax for the period
Current and deferred tax are recognized as an expense or income in profit or loss, except when they relate to items credited or debited directly to equity, in which case the tax is also recognized directly in equity.

3.16 Share capital
Ordinary shares are classified as equity. The Group presents the amount of dividends recognised as distributions to owners during the period in the statement of changes in equity, and the related amount of dividends per share in the notes to the financial statements.

3.17 Share premiums
Share premiums are own funds created as a result of the difference between the issue value of the shares and the nominal value of the shares. The Group recorded share premiums as a result of the issue of shares.

3.18 Revaluation reserve
The increases in the fair value of land and buildings are recorded against revaluation reserves. Any decreases in the fair value of land and buildings are first deducted from the revaluation reserves and then the difference is recorded through profit and loss accounts. The revaluation is performed with sufficient regularity as to ensure that the Group presents land and buildings at fair value in the consolidated financial statements. The revaluation reserve is transferred to retained earnings upon disposal of assets.

3.19 Provisions for risks and charges
Provisions are recognized when the Group has a legal or constructive obligation, as a result of a past event, it is probable that there will be a future outflow of resources in order to settle this obligation and a reliable estimate can be made of the amount of the obligation. Provisions for risks and charges are assessed at the end of each period and adjusted in order to present management's best estimate.
If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Liabilities provided for legal matters require judgements regarding projected outcomes and ranges of losses based on historical experience and recommendations of legal counsel. Litigation is however unpredictable and actual costs incurred could differ from those estimated at the reporting date.

Liabilities for compensated absences refer to the entitlement for employees to accumulate vested leave benefits. The Group recognises a liability for compensated absences as it has an obligation to compensate employees for future absences attributable to employees' services already rendered, the obligation relates to rights that accumulate from period to period, it is probable that the amount will be paid and a reliable estimate can be made of the amount of the obligation.

A vesting obligation is where employees are entitled to a cash payment for unused leave entitled upon leaving the entity. The amount of the obligation will therefore be equal to the number of unused leave multiplied by the relevant employee's gross salary at the reporting date.

The obligation is initially recognised during the vesting period based on the best available estimate of the accumulated leave expected to vest. The estimate is revised each period end if subsequent information indicates that the accumulated leave expected to vest differs from previous estimates. On vesting date, the Group revises its estimate to equal the accumulated leave that ultimately vested.

3.20 Revenue from contracts with customers recognition
Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

Revenue is recognised over time where (i) there is a continuous transfer of control to the customer in the case of goods provided or the consumption of the benefits for the services provided takes place over time; or (ii) there is no alternative use for any asset created and there is an enforceable right to payment for performance completed to date. Other revenue contracts are recognised at a point in time when control of the goods transfers to the customer, or in the case of services provided, when the customer receives and consumes the benefits provided.

The Group provides health care medical services to corporate and retail customers, in which one performance obligation is a promise to transfer distinct services to the beneficiary. Another business line that is continuously being developed in the Group in close relationship with the medical act is the delivery of goods (mainly generic medicines) under contractual conditions. The moment the client acquires control over the goods is considered to be substantially the same for most of the Group's contracts under IFRS 15.

Group's core activities
The Group's core activities are conducted through six main business lines, providing a well-balanced business portfolio that covers all key layers of the private medical services market. Disaggregation of revenue from contracts with customers by business line comprises the following major categories: clinics, stomatology, hospitals, laboratories, pharmacies and corporate.

The Group's business and revenue model focuses on the spending power of corporations and private individuals on medical services, while the State's contribution through the National Health Insurance House ("NHIH") represents a complement, not the core revenue of Group's activities. However, the National Health Insurance House is considered to be one major customer that goes across multiple sectors such as: clinics, hospitals and laboratories, and from which the Group receives the consideration based on reaching pre-established ceilings, for the medical services provided to the State's insured patients, which are the end users of the healthcare medical services. The revenue in relation with NHIH is recognised at the end of the month, when the Group has an enforceable right to receive payment for performance completed up to date, as the end user receives and consumes the benefits provided by the entity's performance as the entity performs.

Clinics
The core of the Group's operations is the network of ambulatory clinics. The business line comprises a network of 98 facilities, which offer a wide range of outpatient services covering a broad range of medical specialties. The Group's diagnostic imaging services provided to clients other than hospital inpatients also form part of this business line. The Group's clinics provide a wide range of services delivered mainly in two formats:

- ***Hyper clinics***, a format pioneered by the Group in Romania, consisting of large facilities with at least 20 medical offices and surface areas in excess of 1,000 sqm. It is a one-stop-shop for clinical examinations and imaging. This format is designed for larger urban areas, with a population over 175,000. Hyper clinics would usually include a broad range of imaging services on site including radiology, bone density – DEXA, CT, MRI, 2D-4D ultrasounds and Mammography; in the case of new openings, such services may be included in the hyper clinics' offering gradually. Hyper clinic locations also host the services of other business lines, such as sampling points for laboratories.
- ***Clinics***, offering a range of treatments from general practitioner services to specialists, are aimed at servicing the core needs of the Group's HPP patients and FFS clients. The Group's clinics typically have between 5 and 12 medical offices, although smaller satellite clinics are in operation to address specific market situations. Clinics are designed for smaller cities or to serve specific concentrations of patients. Clinics, with limited capacity and generally limited imaging services, act as feeder networks for the more specialized services located in the hyper clinics.

The revenues are recognised at a point in time when the customer receives and consumes the benefits provided.

Stomatology
The Group's Dentistry business line offers a full range of services, ranging from medical examinations to surgery, implants or orthodontic services.

Stomatology business line is not subject to NHIH allocations. All of the sales are fee for service ("FFS") based, and the revenue is recognised at a point in time, when the performance obligation is satisfied.

Laboratories
The Laboratories business line provides the following range of services: biochemistry, pathological anatomy (cytology and histology), molecular biology and genetics, haematology, immunology, microbiology and toxicology. Sampling points are locations where the Group collects blood and other samples from patients. The Laboratories business line sources the bulk of its revenue from FFS clients, and the revenue is recognised at a point in time, when the performance obligation is satisfied.

One exception is when the Group provides laboratory tests to other companies' employees and the revenue is recognised at the end of the month, not immediately after the laboratory tests are performed, when the Group has an enforceable right to payment for performance completed up to date. From IFRS 15 perspective, the revenue is recognised at a point in time (at the end of the month).

Hospitals
Hospital services provided to patients are regarded as a bundle of services which comprise medical services, accommodation, meals, use of equipment, pharmacy stock and nursing services. This is considered to be a single performance obligation as the medical procedures cannot be performed without one of the above elements.
Revenue is recorded during the period in which the hospital service is provided and is based on the amounts due from patients. Fees are calculated and billed based on various tariff agreements.

The Hospitals business line derives its revenue predominantly from FFS patients. Treatment of State insured patients for the NHIH, generally relates to maternity, genecology, cardiology and oncology. The revenues are recognised at a point in time, when the consumption of the benefits for the services provided is accomplished.

The Group does not expect to have any contracts where the period between the transfer of the promised service to the patient and the payment by the patient exceeds one year. Consequently, the Group does not adjust any of the transaction prices for time value of money.

Pharmacies
This business line is continuously being developed in the Group in close relationship with the medical act, and refers to the delivery of goods (mainly generic medicines) to customers.

In 2010, the Group launched its Pharmalife brand of pharmacies in order to capture additional revenue from the existing patient traffic in the Group's clinics. Pharmalife operates pharmacies only in the Group's own units, where the space, authorization and sales option allow, but also in the proximity of the units.

As of December 31, 2022, there were 23 functional pharmacies, offering patients both prescription and over-the-counter products, including Doctor Life's own branded products.

During 2021, the pharmacy network expanded with the acquisition of the Ced Pharma group of companies, which brought 6 more pharmacies in the Group.

Corporate
The Corporate business line offers HPPs (health prevention packages) on a subscription basis, generally to corporate clients, as part of the benefit packages for their employees. These programs, which focus on prevention, such as regular check-up's and access to diagnostic services, complement the legally required occupational health services that corporate clients contract from the Group as the Standard HPP.
The Group has a portfolio of over 800,000 HPPs patients.

The HPPs offered by the Group consist of the following:
- Mandatory occupational health services, which mainly include the provision of annual employee check-ups and more specific services depending on the client's industry. Many companies begin by purchasing occupational health services under the "Standard" HPP and then add benefits under broader HPPs from the same provider for certain or all of their employees, providing an upselling opportunity for the occupational health provider.
- More general, "prevention oriented" health plans, providing expanded access to general practitioners and certain specialists in the Group's clinics and as well as specified laboratory tests and diagnostic imaging for higher end packages. The specific services vary depending on the type of package.

The revenue in relation with corporate customers is recognized over time. Under the output method, the entity would measure completion of the total performance obligation either in relation to the total obligation that has been satisfied or in relation to what remains to be satisfied, based on health prevention packages delivered.

Other revenue stream
On the "Other" business line, there are included revenues obtained as a result of distribution of generic medicine from large producers to a list of pharmacies, revenues obtained through wellness services (new starting with 2022), revenues obtained as a result of the production and storage of cell deposits and other types of revenues.

In the case of distribution, revenues are recognized when the goods are transferred to the customers, at a point in time.

For wellness services, revenues are recognized over time, closely related to how the consumption of the benefits for the services provided on a subscription basis takes place over time.

In the case of stem cells bank subsidiary of MedLife Group, Stem Cells Bank SA (SCB), its core business is the collection, preparation and storage of stem cells from umbilical cord blood and tissue.

SCB cooperates with numerous maternity facilities in Romania. The company regularly trains clinic staff in the professional collection of umbilical cord blood and tissue as well as related duties in accordance with the appropriate national regulations in order to ensure the greatest possible process quality.
After collection in one of the partner clinics, the stem cells are transported to the laboratory location in Timisoara. There, they are examined as well as cryopreserved and stored on the basis of the corresponding manufacturer's permit. The stem cells from umbilical cord blood and tissue are thus preserved for therapeutic use for many years. With the storage, parents invest in the participation in medical progress and thus in a preventive product by securing a unique chance for their child directly at birth.

Revenues from SCB activity represents the equivalent value of operating activities. Fees received for storage services to be provided over several periods are recognized over the period in which the corresponding storage is provided. The production and storage of cell deposits are separate performance obligations of a multi-component business. Revenue from the manufacture of cell deposits is recognized when the process of cell collection, preparation and storage is complete. Revenue from the storage of cell deposits is recognized over the contractually agreed storage period. Here, the input-based method is chosen to measure the progress of the service, since it is not possible to measure the flow of benefits to the customer (output-based method) in isolation for the service obligation "storage of a cell deposit". Price discounts granted at the level of individual contracts are allocated to the service obligation "production of cell deposits".

Presence of a financing component
In case of prepayment for several years, the Group receives one single prepayment for both the processing and cell deposit storage from the customer. In view of the nature of the service provided, the payment terms offered by the Group are determined for reasons other than the provision of financing to the customer. Therefore, the Group considers that these advance payments do not include a financing component.

The Group also offers annual payment contracts with a minimum contract term of several years. Transaction price for this contract is determined taking into account all payments to be made by the customer during the contract period. In these cases, the payment received from the customer at the beginning of the contract is below the production cost of the service obligations "processing and storage of a cell deposit". For this reason, the Group concludes that there is a financing component for these contracts. Therefore, for payments due in more than one year, an adjustment is made for the time value of money.

In order to derive the discount rate to be used for the receivables of MedLife Group linked to stem cells banks operating activities, we have obtained the relevant rates for loans granted by Romanian banks to Individuals in EUR (such loans are usually granted for housing purposes). However, we consider that the rates are not suitable to be used as a proxy for stem cells bank`s activity and substantiated the analysis considering the importance of stem cells to a family and the value of the contracts, which are substantially lower as compared with a standard EUR loan granted by a Bank.

Stem cell treatments and therapies are increasingly becoming recognized for their potential to treat and cure various life-threatening diseases and conditions. As a result, the importance of stem cells to a family cannot be understated. Families are highly motivated to make their contract repayments in a timely manner to ensure continued access to this critical resource. Consequently, the risk of default is lower for stem cell loans compared to housing loans, as families prioritize the health and wellbeing of their loved ones above other financial obligations.

In terms of value of the contract and corresponding installments, the overall cost of purchasing production and storage of stem cells is significantly lower than the cost of buying a house. As a result, the loan amount required for SCB services acquisition is also lower, leading to smaller monthly/yearly installments. This reduced financial burden makes it more manageable for families to meet their loan repayment obligations, thus decreasing the risk of non-payment. Moreover, lower loan values and installments can also reduce the risk of financial strain on the borrower, which can further minimize the likelihood of default. Since the repayment amounts are more manageable, borrowers may be less likely to encounter financial difficulties that could lead to missed payments or default on the loan.

In conclusion, given the analysis performed, the Group used as a proxy the relevant rates for loans granted by Romanian banks to companies in EUR. Moreover, considering that the loans to companies are usually done on lower maturities (1Y), we have performed a maturity adjustment based on the yield of the Euro area curves (for 2022, given the inverse shape of the curve, this leads to a reduced value of the interest rate).

Principal versus agent considerations
The Group has concluded that they are the principal in all of their revenue arrangements since they are the primary obligor in all the revenue arrangements, have pricing latitude and are also exposed to inventory, in the case of medicines sold.

Contract assets and liabilities
A contract asset (accrued income) is the right to consideration in exchange for services transferred to the customer. Where the Group transfers services to a customer over time before the customer pays consideration or before payment is due, a contract asset is recognized for the earned consideration to date under the contract. Contract assets are presented within trade and other receivables (Note 7) on the Group Consolidated Statement of Financial Position and are expected to be realized in less than one year.

A contract liability (deferred income) is the obligation to transfer services to a customer for which the Group has received consideration from the customer. Where the customer pays consideration before the Group transfers services to the customer, a contract liability is recognized when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognized as revenue when the Group performs under the contract. Contract liabilities are presented within trade and other payables (Note 10) on the Consolidated Statement of Financial Position.

Using the practical expedient in IFRS 15, the Group does not adjust the promised amount of consideration for the effects of a significant financing component if it expects, at contract inception, that the period between the transfer of the promised service to the customer and when the customer pays for that service will be one year or less. All the contracts are under one year.

Contracts are for periods of less than one year or are billed based on services incurred. As permitted under IFRS 15, the transaction price allocated to these unsatisfied contracts is not disclosed.

3.21 Employee benefits

Employee benefits
The Group, in the normal course of business, makes payments to the Romanian State on behalf of its employees for pensions, health care and unemployment cover. The cost of these payments is charged to the statement of comprehensive income in the same period as the related salary cost.

All employees of the Group are members of the Romanian State pension plan. The Group does not operate any other pension scheme.
Bonus schemes
The Group recognizes a liability and an expense where a contractual obligation exists for short-term incentives. The amounts payable to employees in respect of the short-term incentive schemes are determined based on annual business performance targets.

3.22 Fair value
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

Certain accounting policies of the Group and information presentation criteria require determination of the fair value both for the assets and the liabilities of the Group. In determining the fair value of assets and liabilities, the Group uses as much as possible observable market values. Fair values are classified on various levels based on inputs used in valuation techniques, as follows:

- Level 1: (unadjusted) quoted prices on active markets for identical assets and liabilities
- Level 2: inputs, other than the prices included in level 1, which are observable for assets and liabilities, either directly (e.g.: prices) or indirectly (e.g.: derived from prices)
- Level 3: inputs for evaluation of assets and liabilities which are not based on observable market data.

In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group engages third party qualified valuers to perform the valuation.

For assets and liabilities that are recognised in the financial statements at fair value on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Further information about the assumptions made in measuring fair values is included in the Note 5.1, Note 5.3, Note 5.4 and Note 4.

3.23 Segment information

The core business activity of the Group refers to the provision of healthcare services, as a result of completion of the medical act. This process usually involves multiple stages, starting from physical examinations, laboratory tests, set-up of a diagnosis, offering treatment, supply of medical equipment, surgeries and other medical interventions, nursing care, follow-up in the recovery process.

Starting with 2022, the category "Other revenues" comprises also the integration of the Sweat gyms acquired, which mark Group Medlife's entry into a new business layer, that of wellness. This layer complements the medical diagnostic and treatment services offered at the national level through the contribution that it provides in reaching a healthier lifestyle for patients, on the long term.

In close relationship with the provision of healthcare services, the Group has also developed two channels for the sale of goods: (i) sale of pharmaceutical products to a pool of patients majority of which are the same consumers who benefit from the healthcare services provided, considering that most of the group's pharmacies are located in the hyper clinics; (ii) starting with August 2021, as a result of the acquisition of the subsidiary named Pharmachem Distributie, distribution of generic medicine from large drugs producers to a list of pharmacies, including the ones owned by the Group; however, this channel of revenue stream is not considered to be key essential in terms of results obtained, therefore it was included in the seventh business line as "Other".

An operating segment is a component of an entity:

(a) that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity),
(b) whose operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and
(c) for which discrete financial information is available.

The Group has identified six core business lines, which comprise the following major categories: clinics, stomatology, hospitals, laboratories, pharmacies and corporate.
The core purpose of the Group is to enhance the quality of life for individuals, the ultimate end users of healthcare services, therefore setting the patient as first priority in all activities performed.

According to IFRS 8, segment information on operating segments is to be presented in accordance with the internal reporting to the chief operating decision maker (management approach).
In determining the Group's operating segments, management has primarily considered the financial information in internal reports that are reviewed and used by the Board of Directors (who together are the chief operating decision maker of MedLife Group) in assessing performance and in determining the allocation of resources.

The Board of Directors represents the chief decision-making body, in which the strategic decisions are made for the entire Group and to which the key parameters of performance are reported.

Each reporting made to the Board of Directors includes the six business lines. Group managements costs are fully distributed to the operative business lines. The monthly target-to-actual and actual-to-actual comparison in the report to the Board of Directors serves to control the targets published in the Group's annual forecast, in particular the total revenue figure and EBITDA margin.

Given our understanding of an integrated healthcare services offering, we do not make any distinction in control by whether the services as defined in Romanian social insurance legislation are attributed to the inpatient or the outpatient sector, for example in the hospitals business line. All expenses and income which are directly or indirectly related to patients are included under the operating segments.

The following operating segments are aggregated to one reporting segment, being the provision of healthcare services, since they exhibit similar economic characteristics: clinics, stomatology, hospitals, laboratories and corporate. Other segments are presented as Other in these financial statements.
Starting with 2022, the wellness business line can be assimilated to the Other segment category, which also includes the processing and storage services for stem cells.

As a result of the same structural framework conditions, the operations of the Group with the healthcare services provided are characterised by a similar risk and rewards profile whose economic environment is largely regulated by legislation. It is thus possible for the operations to achieve similar EBITDA margins on the long term. We thus continue to have only one reportable segment that aggregates the above mentioned operating segments.
The Group generates most of all revenues for all areas of activity in Romania, with only a small share of revenues (below 2%) being generated from operations held in Hungary. Although there are locations in different countries, the executive

management assumes that the resulting differences in the billing logic do not entail any material different opportunities and risks and these therefore do not conflict with aggregating the healthcare services into a single segment.

The characteristics of healthcare services are around physical facilities staffed by professionals in direct contact with patients, diagnosing, monitoring and treating patients. The payment for these services are either direct payment by the patient or indirect via an employer paid benefit/insurance and in much smaller degree by public health funds. In all these cases the beneficiary of the service is always the individual patient. Because of the specific nature of the source of funds that finance the provision of medical services to the end users (i.e. patients) the correct allocation of profitability for each business line is limited considering that they are complementary in servicing the patient: one would originate whereas the other might render the medical services. In this respect, the business lines could not operate on their own, proving, once again, their high interdependent nature.

The other business lines (i.e. sale of goods such as sale of pharmaceutical products or distribution of generic medicine, processing and storage services for stem cells, wellness services), which are further included in the business line named "pharmacies" or "other" (in the case of distribution of medicine, stem cells or wellness services), either do not meet the definition of an operating segment or do not exceed, individually and in total, the quantitative thresholds set in IFRS 8 in order to qualify as a reportable segment.

In order to enable users of the financial statements to evaluate the nature and financial effects of the business, the Group decided to present the revenues split on the main business lines.

3.24 Leases

Given its large and complex operations, the Group leases a significant number of assets including buildings and land for operational activities, medical equipment and vehicles. Contractual periods differ, depending on the lease type and the leased asset, the driver being the strategic point of view the Group has into further managing its asset portfolio.

As a result of the pandemic crisis, the Group commenced the process of securing its strategic facilities under lease agreements, for longer periods of time. Accordingly, several major lease agreements have been renegotiated with focus on better commercial conditions for the Group, in terms of both pricing and better security over extension options for the lease agreements.

In this respect, the management has evaluated its options for early termination as well as the existence of the Group's single triggered decision to extend the lease term, on a case-by-case basis. In determining the lease term, all facts and circumstances that create an economic incentive to exercise an extension option, or to exercise a termination option, are considered.

The Group leases various buildings, equipment, vehicles and other assets. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor.

The Group's assesses whether a contract is or contains a lease, at inception of the contract. Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group - except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. Payments associated with short-term leases and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Assets and liabilities arising from a lease are initially measured on a present value basis.

Lease liabilities include the net present value of the following lease payments to be made over the lease term:
- Fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- The exercise price of a purchase option if the Group is reasonably certain to exercise that option;
- Payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option;
- Amounts expected to be paid under residual value guarantees;
- Lease payments to be made over the contractual lease term, if there are extension options included.

The lease payments are discounted using the lessee's incremental borrowing rate, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions. To determine the incremental borrowing rate, the Group uses recent third-party financing received by the lessee as a starting point and adjusts the rate to reflect changes in financing conditions since the third-party financing was received.

The lease liability is presented as a separate line in the statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:
- The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an

unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

Right-of-use assets are measured at cost comprising the following:
- The amount of the initial measurement of lease liability;
- Any lease payments made at or before the commencement date less any lease incentives;
- Any initial direct costs; and
- Restoration costs.

After initial recognition, right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities.
Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

The right-of-use assets are presented as a separate line in the consolidated statement of financial position.

The Group applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Property, Plant and Equipment' policy.
Variable rents that do not depend on an index or rate are not included in the measurement the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs.

As a practical expedient, IFRS 16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Company has used this practical expedient.

The following useful lives on average are used in the calculation of depreciation for right-of-use assets, determined based on the lease term of the contractual agreements:

	Years
Buildings	6 – 10 years
Medical equipment	3 – 4 years
Vehicles	3 – 5 years

3.25 Earnings per share

Basic earnings per share is calculated by dividing:
- the profit attributable to owners of the Group, excluding any costs of servicing equity other than ordinary shares;
- by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the year and excluding treasury shares.

3.26 Treasury shares

Own equity instruments that are reacquired (treasury shares) are recognised at cost and deducted from equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments. Any difference between the carrying amount and the consideration, if reissued, is recognised in the share premium.

4. GOODWILL

The Group records goodwill resulting from business combinations. Please see below the goodwill recorded as of December 31, 2022 and December 31, 2021 (carrying amount):

Movement in Goodwill

	December 31, 2022	**January 1, 2022**
Balance at the beginning of the year	199,679,613	147,256,824
Goodwill recognized during the year	168,992,993	52,422,789
Impairment	-	-
TOTAL	**368,672,606**	**199,679,613**

During the year ended December 31, 2022, the Group obtained control over various companies and recorded an additional goodwill of RON 168,992,993 (December 31, 2021: RON 52,422,789). For further details on business combinations acquired during the year ended December 31, 2022 and the year ended December 31, 2021, please see Note 27.

Accumulated impairment over Goodwill amounts to RON 313,506 as of 31 December 2022 (RON 313,506 as of 31 December 2021).

For the purpose of impairment testing, goodwill is allocated to the cash generating unit (CGU) which is expected to benefit from the synergies of the business combination. Intangible assets with indefinite useful lives are also allocated to CGUs and tested for impairment. Management conducts impairment tests on an annual basis or whenever there is an indication of impairment to assess the recoverability of the carrying value of goodwill and intangible assets with indefinite useful life, at each individual level. No impaired goodwill or intangible assets with indefinite useful life was identified in this context. For more details regarding intangible assets with indefinite useful life please see Notes 5.2 and 5.3

The recoverable amount is based on fair value less cost of disposal (FVLCOD) of the underlying assets. There are 43 CGUs included in the valuation process, as the remaining ones have a carrying amount that is not considered to be significant in comparison with the Group's total carrying amount of goodwill.

The discounted future Cash flows of the CGUs, using the DCF method, are determined on the basis of the approved business plans for 2023 that forecast financial position and results of operations and take into account historical values and estimated performance. Cash flows are estimated in RON, having a nominal value. The results are then extrapolated for six additional years using bottom-up, six-year planning that reflects the future development of the CGUs under current conditions.

After the six-year time period, a perpetuity value is calculated using a conservative Group-wide growth rate. To determine the present value of future Cash flows, a discount rate based on the weighted average cost of capital (WACC) is applied.

The valuation is considered to be level 3 in the fair value hierarchy due to unobservable inputs used in the valuation.
There are a number of key sensitive judgements made in determining the inputs into these models which include:
- Revenue growth considered for the next years and also the perpetual growth rate
- Operating margins and
- The discount rates applied to the projected future cash flows.

The following data provides information on key assumptions used to compile corporate planning:
- Expected development of sales revenue (new customers, market development in general); Group's own estimates referring to past experiences and expected market trends, market potential analysis. External market studies are also used, if available.
- Application of current and historical organic growth rates for business units or business areas.
- Consideration of regulatory changes affecting the development of business units.
- Development of purchased services based on current circumstances (e.g., contractual basis, strategic business model) and the anticipated development of sales activities (expected revenue situation).
- Expected development of personnel expenses and other operating expenses, based on demand analyses, contractual framework and statistical procedures (e.g., inflation).

The estimated future Cash flows are derived from the business plans approved by the responsible bodies. The assumptions underlying the main planning parameters take into account not only past experience and aspects arising from the operating business.

The operating margin results from the application of the assumed planning assumptions. For the subsequent years, an average of the operating margins are assumed (continuation planning period), adding a slight increase.

Cash flows beyond the six-year period are extrapolated using an estimated growth rate, which is consistent with forecasts included in industry reports specific to the industry in which each CGU operates.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the specific risks of the CGU. WACC (weighted average cost of capital) is used to estimate the rate. The discount rate is independent of the Group's capital structure and how the Group financed the purchase of the asset, because future cash flows expected to arise from an asset do not depend on how the Group financed the purchase of that asset.

In the case of CGUs subject to the impairment test, the discount rates considered are higher than the average industry-level data in emerging European countries to take into account country risk, currency risk, and CGU's size. On average, depending on the particularities of each CGU, the discount rate varies, for the most significant entities in the Group, between 8.4% and 20.5%, depending on the specific risks associated with each CGU.

Estimates of future cash flow management are based on the most recent 6-year forecasts (2023-2028).

The estimation of the terminal value was made based on the hypothesis of continuing the activity. The final value is given by the capitalization of the available cash flow with the capitalization rate which has in view a perpetual increase in close relation with the GDP growth and inflation forecast for Romania.

The analysis of the results shows that for the CGUs subject to the impairment test, the related recoverable amount is higher than their net book value, with sufficient headroom and, therefore, there will be no impairment of goodwill recorded on the reporting date.

The sensitivity analysis that evaluates the sensitivity of the recoverable amount was performed according to the changes of the main factors: WACC discount rate plus 2 percent, operating margin decrease with 20 percent and perpetual growth rate decrease with 1 percent.

In performing the sensitivity analysis, except for Neolife cash generating unit, an increase in WACC of 2 percent would give rise to a reduction in the Group-wide surplus with 21%.
Except for Neolife cash generating unit, a decrease in the operating margin of 20 percent would give rise to a reduction in the Group-wide surplus with 25%.
Except for Neolife cash generating unit, a decrease with 1 percentage point in the perpetual growth rate would give rise to a reduction in the Group-wide surplus with 8%.

For Neolife cash generating unit, an increase in WACC of 2 percent would give rise to a goodwill impairment of 40 mil RON, a decrease in the operating margin of 20 percent would give rise to a goodwill impairment of 58.8 mil RON and a decrease of 1 percentage point in the perpetual growth rate would give rise to a goodwill impairment of 11 mil RON.

Nevertheless, Neolife is a new acquisition completed in 2022. Management is confident that the business plan used in goodwill impairment testing followed a conservative approach, while negative developments in the analysed parameters are unlikely to materialize. No goodwill impairment is expected in the future.

Management has engaged external specialists to assist with the impairment analysis, the entire valuation process being perfomed by certified ANEVAR valuators. There were no changes in the valuation techniques compared to prior year.

(all amounts are expressed in RON, unless otherwise specified)

5. PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

As of December 31, 2022 the Group's property, plant and equipment and intangible assets' structure was the following.
For details regarding additions from business combinations – please see further details in Note 27.

	Intangible assets		*Property, plant and equipment*						
	Intangible assets	**Intangible assets in progres**	**Land**	**Construction**	**Leasehold improvements**	**Vehicles and equipment**	**Construction in progress**	***Total fixed assets***	**TOTAL**

During 2021, the Group has reclassified leased assets with a total net carrying amount of RON 32,194,888 to Right-of-use assets from Property, plant and equipment.
The Group has made this reclassification for a proper presentation of Right-of-use assets in accordance with the requirements of IFRS 16.
The change in presentation has no effect on other items stated on the consolidated statement of financial position or in the consolidated statement of comprehensive income for the year ended December 31, 2021.

*leasehold improvements were presented in the financial statements for the year ended 31 December 2021 as part of Construction.

(all amounts are expressed in RON, unless otherwise specified)

5.1. Land and buildings carried at fair value

The value of land and buildings of the Group are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The fair value measurements of the Group's freehold land and buildings as at 31 December 2022 were performed by independent valuator certified by ANEVAR and having appropriate qualifications and recent experience in the fair value measurement of properties in the relevant locations.

The total revaluation difference was in amount of RON 66,292,412. The difference was recorded in the revaluation reserve in amount of RON 66,292,412 as a surplus. In the consolidated statement of profit or loss on a net basis the overall impact registered is null, as the Group has identified an expense in the amount of RON 1,866,599 in relation with Land and a corresponding gain of RON 1,866,599 on the Buildings side, as a result of the revaluation. Please also refer to Note 26 for impact recognised for Deferred Tax.

Net book value ("NBV") 31 December 2022

	NBV before revaluation	**NBV after revaluation**	**Revaluation differences**
Land	87,508,855	118,558,183	31,049,328
Buildings	262,115,754	297,358,837	35,243,083
TOTAL	**349,624,609**	**415,917,021**	**66,292,412**

The fair value was determined by reference to market-based evidence, using the market comparable method, the cost and income approach. The valuation techniques are selected by the independent appraiser, in accordance with International Valuation Standards.
The fair value is overall determined to be Level 3 in the fair value measurement hierarchy. The inputs used in the valuation were:
- Level 2 inputs based on the IFRS 13 classification (e.g. current rents, prices per sqm, yields, occupancy rates, etc. publicly available on the market for similar assets and other market-corroborated inputs), or
- Level 3 (unobservable) inputs through which Group develops unobservable inputs using the best information available in the circumstances, which might include the entity's own data, rather than direct inputs from the market, with orderly adjustments performed by the appraiser in order to determine fair value.

The fair value of the free land was determined based on the market price comparison method. This method was considered appropriate due to the nature of the assets valued, which have an active market. An active market is a market that simultaneously meets the following three conditions: goods traded on the market are homogeneous, buyers and sellers can be found at any time on the market and prices are available to the public.
In estimating the value, it was taken into account the physical condition indicated by the company's representatives and found at the time of the field valuation of the assets, as well as the information available in relation to the analysed assets and data extracted from the market analysis. Assets were compared with other similar assets and adjustments were made accordingly to indicate the current value.

The cost approach was chosen exclusively for properties that, although directly generating profit, have a unique nature, special destination and physical characteristics. The assets which were valued with cost approach refers mostly to hospital buildings. The lack of hospital facilities on the market makes the Income or Market approach very difficult to apply due to absence of market comparable or, if any exist, they are extremely limited and insignificant in terms of equipment or involved surface areas.
The cost method reflects the costs which a market participant would incur to construct or acquire assets of similar utility and age, adjusted for obsolescence and other relevant forms of depreciation.

The income approach is based on the idea that the real estate being appraised can be a revenue-generating investment. The rental value is obtained through direct comparisons from the appraiser's database or information obtained from real estate agencies, using the average rental values identified in the market, or, if the situation of the building requires it, the closest rental value can be selected by considering the similarity of comparable properties.
Direct capitalization is the method used to transform the estimated level of net income into a property valuation indicator. Considering the fact that certain buildings with clinical functionality can be converted into office spaces, the appraiser used the income approach. Thus, comparable rental and sale market data for relatively similar buildings were extracted to generate both an average rent and an average capitalization rate, which in turn led to a value for the analysed property. The reported rents are of a contractual nature, therefore, the facilities granted by the owner (such as free rent months or the owner's contribution to the space arrangement) are not taken into account.

For the sensitivity analysis two important elements of the income approach were analysed, namely:
- Losses due to vacancy
- Capitalization rate

Losses due to vacancy represent the loss of potential gross income in case the property that is intended to be rented cannot be rented, rent is not paid or the tenant is changed. It generally represents the ratio between demand and supply in the real estate market at a given time. + 2.1% percentages was used, which represent a period of one week that is added to the vacancy loss considered valid for each property, taking into account both the type of building and the size of the city. As a result the value of the properties appraised through income approach decreased overall with RON 1,737,256.

(all amounts are expressed in RON, unless otherwise specified)

The capitalization rate (yield) expresses the ratio between the expected net operating income for one year and the total value of the property obtained from the transaction. This does not express the performance of the investment, but it can be an indicator of the real estate market performance at a given time. The capitalization rate may fluctuate depending on the income forecast and the change in property value. For the sensitivity analysis was subtracted - 0.25% from the capitalization rate identified by the market, resulting in a potential negative variation of rental values. The overall effect resulted in a decrease of RON 2,280,490 in the fair value of the buildings.

If the lands and buildings of the Group had been valued at historical cost, their book value would have been the one presented below:

Carrying amount without revaluation	**31 December 2022**	**1 January 2022**
Land	60,371,256	4,705,086
Constructions	171,289,000	169,063,229
TOTAL	**231,660,256**	**173,768,315**

Part of the items related to Land and Buildings are included in the cash-generating units established for the Group and annually tested for impairment as part of the goodwill impairment testing, please refer to Note 4 for more details. For the carrying value of property, plant and equipment pledged to secure the borrowings please refer to Note 14.

5.2. Intangible assets

Carrying amount	**December 31, 2022**	**January 1, 2022**
Customer lists	13,132,836	10,891,714
Contract advantage	12,932,301	3,891,897
Trademark	42,497,347	30,106,819
Concessions, patents, licenses, trademarks and similar rights and assets and other intangible assets	31,629,780	15,666,225
TOTAL	**100,192,265**	**60,556,655**

At initial recognition, trademarks resulted from business combinations, used to identify and distinguish the medical services, customer list, contract advantages had an indefinite useful life. Starting with 2021, the Group has decided to allocate a definite useful life for both customer lists and contract advantages. Under IFRS, this change in estimate was made in 2021 on a prospective basis.

Trademarks

The Group intends to use these intangibles continuously and evidence supports its ability to do so. An analysis of market and competitive trends provides evidence that the services will generate net cash inflows for the group for an indefinite period. Therefore, the intangibles are carried at cost without amortisation, but are annually tested for impairment.

The following factors were considered in determining the indefinite useful life for the above intangible assets, including:
- the indefinite useful life of an asset means that the asset's usefulness to the business is not limited by age, legal or regulatory obligations, contracts, or any other factory;
- also, the useful life cannot be reasonably estimated as to determine a precise period over which the asset will generate benefits to the Group through the continuous use.

The useful life for trademarks cannot be reasonably estimated as they are intended to generate future benefits over the period which the company is expected to continue its activity.

Customer lists and contracts advantages

Starting with 2021, the Group has allocated the following useful lives for:

	Years
Customer lists	10 years
Contract advantages	5 years

These intangibles are depreciated on a straight-line basis.

(all amounts are expressed in RON, unless otherwise specified)

Other intangibles

All the other intangibles are depreciated on a straight-line basis, over a period of 3 years. During 2022, the costs incurred with the website implementation were capitalised as a new intangible asset, which is amortized over a period of 3 years.

The capitalized cost for intangible assets recognized during the year is already included in the other intangible assets on the balance sheet – for further details please see Note 20.

5.3. Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognized separately from goodwill are initially recognized at their fair value at the acquisition date (which is regarded as their cost). The fair value of intangible assets was assessed by an independent appraiser at acquisition date and are further presented below:

Subsidiary	Customer List	Contract Advantage	Trademark	Total
Policlinica de Diagnostic Rapid (2010)	2,335,446	282,163	-	2,617,609

Grupul Medici`s (includes Medici's SRL and Micro-Medic SRL) (2022)	3,610,000	4,330,000	601,000	8,541,000
Total	**17,697,120**	**16,266,035**	**42,497,347**	**76,460,502**

(all amounts are expressed in RON, unless otherwise specified)

The fair value of intangible assets at acquisition date was measured using level 3 fair value measurements.
In 2022, for trademarks measurement, the royalty relief valuation technique was used, with the following inputs: i) Royalty Rate between 0.8% and 1.2% and ii) Capitalization Rate between 9.5% and 16.3%.
For customer lists measurement, the multi-period surplus economic benefits valuation technique was used, with a return rate for customers above 90%, returns on contributing assets ranging between 5.1% and 17.4% and a discount rate which reflects the specific risks of the intangible asset of 13.2% and 17.4%.

5.4. OTHER FINANCIAL ASSETS

Carrying amount	**December 31, 2022**	**January 1, 2022**
Long-term receivables for stem cells processing	36,518,106	30,220,311
Allowance for doubtful long-term receivables	(2,631,842)	-
Advances for acquisition of subsidiaries	48,924,440	1,390,275
TOTAL	**82,810,704**	**31,610,586**

Trade receivables of SCB with payments due in more than one year are presented under Other financial assets.
Trade receivables were individually assessed taking into account specific information available in individual cases when measuring credit risks.

An allowance for doubtful receivables was determined for certain customers for which management assessed high credit risk.

6. INVENTORIES

	December 31, 2022	**January 1, 2022**
Consumables	50,500,617	30,688,305
Materials in the form of inventory items	1,153,623	658,855
Merchandise	47,115,210	42,879,249
Inventory in transit	920	3,176
TOTAL	**98,770,370**	**74,229,585**

The cost of inventories recognised as an expense in 2022 is RON 900,203 (2021: RON 827,296) in respect of write-downs of inventory to net realisable value.

7. TRADE RECEIVABLES AND OTHER ASSETS

	December 31, 2022	**January 1, 2022**
Trade receivables	258,302,033	173,645,157
Allowance for doubtful receivables	(36,943,173)	(33,288,919)
TOTAL	**221,358,860**	**140,356,238**

Credit risk for MedLife Group primarily relates to trade receivables in the ordinary course of business. Customers' compliance with agreed credit terms is monitored regularly and closely. Where payments are delayed by customers, steps are taken to restrict access to services or contracts are terminated.

Certain customers, which are public or quasi-public institutions, or subsidiaries of MedLife, may have longer payment terms and services may continue to be delivered when amounts are overdue, based on management's assessment of a lower credit risk.

The average receivable period for the services offered is 95 days. There is no interest on commercial receivables within the first 95 days from the date of issue of the invoice, which also represents the average contractual term.

The carrying amount of financial assets, measured at amortised cost, represents the maximum credit exposure. There are no credit enhancements or collateral held that would offset such amounts. As the customer base of the Group is very diverse, there are generally no large concentrations of credit risk.

Based on the assessed credit risk of the customers, Group`s trade receivables are split between individually assessed and collectively assessed.

(all amounts are expressed in RON, unless otherwise specified)

December 31, 2022	**Individually assessed**	**Collectively assessed**	**Total**
Customers	119,431,189	138,870,844	258,302,033
Allowance for doubtful receivables	(11,330,452)	(25,612,720)	(36,943,173)
Total	**108,100,736**	**113,258,124**	**221,358,860**

January 1, 2022	**Individually assessed**	**Collectively assessed**	**Total**
Customers	72,051,891	101,593,265	173,645,157
Allowance for doubtful receivables	(10,732,439)	(22,556,481)	(33,288,919)
Total	**61,319,453**	**79,036,784**	**140,356,238**

Individually assessed trade receivables include mainly accrued income and trade receivables from National Health Insurance House for which due to management`s assessment of a lower credit risk, no allowance for doubtful receivables in deemed necessary.

As an exception, as accrued income, it is included an amount of RON 7,365,835 which represents amounts receivable by MedLife S.A. from the Health Insurance House of the Municipality of Bucharest, not yet invoiced. The Company has booked this amount in the previous years.
The company has also commenced court proceedings in the past against the Health Insurance House of Bucharest. The management of the Company is confident that the amount will be recovered in the end, but considering the unfavourable decisions of the courts in similar cases, the Company has decided to register a value adjustment for the entire amount in the previous years. As of 31 December 2022 and 31 December 2021, the amounts, both the receivable and the 100% allowance are still in balance.
Remaining amounts recorded in accrued income represent services rendered, for which the invoices were not yet issued as at year end.

The allowance for doubtful receivables for individually assessed trade receivables include the value adjustment aforementioned as well as allowance for certain customers for which management assessed high credit risk and computed allowance for doubtful receivables for the entire amount.

The Group applies the simplified approach for providing for expected credit losses (ECL) prescribed by IFRS 9, which requires the use of the lifetime expected loss provision for all trade receivables which are collectively analysed.

A provision matrix was prepared based on historical observed default rates over the expected life of trade receivables resulting in an ECL reflecting the predictive risk by type of customer. Changes in economic conditions were also considered as part of forward-looking information.

Estimating adjustments for doubtful receivables involves forecasting future macroeconomic conditions for 2023, compared to the average during 2019-2021. The incorporation of forward-looking elements reflects the Groups expectations. GDP (Gross Domestic Product) was used as a macroeconomic factor considered statistically relevant for the analyzed trade receivables.

The allowance for doubtful receivables collectively assessed based on the Group’s provision matrix arising from the ECL was determined as follows:

December 31, 2022	**Current**	**<30 days**	**< 90 days**	**< 180 days**	**< 365 days**	**> 365 days**	**Total**
Expected credit loss rate	0.26%	1.17%	5.02%	10.84%	37.18%	72.45%	
Customers	93,193,672	5,442,137	2,864,506	1,863,002	2,149,554	33,357,973	138,870,844
Allowance for doubtful receivables	(238,013)	(63,495)	(143,727)	(201,946)	(799,221)	(24,166,318)	(25,612,720)
TOTAL	**92,955,659**	**5,378,642**	**2,720,779**	**1,661,056**	**1,350,333**	**9,191,654**	**113,258,124**

January 1, 2022	**Current**	**<30 days**	**< 90 days**	**<180 days**	**<365 days**	**>365 days**	**Total**
Expected credit loss rate	0.35%	2.33%	10.61%	20.44%	41.12%	67.53%	
Customers	59,474,058	4,878,680	2,320,280	1,819,165	2,785,714	30,315,368	101,593,265
Allowance for doubtful receivables	(207,821)	(113,705)	(246,115)	(371,874)	(1,145,428)	(20,471,538)	(22,556,481)
TOTAL	**59,266,237**	**4,764,975**	**2,074,165**	**1,447,291**	**1,640,286**	**9,843,831**	**79,036,784**

For Customers in ">365 days" category, the expected credit loss rate of 72.45% represents an average of expected credit loss rates, depending on the aging of the receivables. Expected credit loss rates range from 48.5% for receivables from 2021 gradually increasing to 100%.

A reconciliation of the allowance for doubtful receivables is presented as follows:

(all amounts are expressed in RON, unless otherwise specified)

	2022	2021
As at 1 January	**33,288,919**	**27,129,452**
Business combinations	1,434,497	890,199
Recognised in income statement	2,219,757	5,269,269
Amounts written off	-	-
As at 31 December	**36,943,173**	**33,288,919**

For the carrying value of trade receivables pledged to secure the borrowings please refer to Note 14.

Other assets
Other assets have increased from RON 24,357,735 as of 31 December 2021 to RON 44,362,334 as of 31 December 2022.

Other assets include guarantees paid in the amount of RON 7,415,600 (as of 31 December 2021: RON 5,827,723), advances paid in the amount of RON 24,181,412 (31 December 2021: RON 11,558,371), other subsidies received in the amount of 4,750,309 (31 December 2021: RON 3,091,441) and other sundry debtors in the amount of RON 3,577,991 (31 December 2021: RON 4,164,224).

8. CASH AND BANKS

	December 31, 2022	January 1, 2022
Cash in bank	85,385,761	130,733,309
Cash in hand	2,554,466	2,367,682
Cash equivalents	1,127,928	2,757,898
TOTAL	**89,068,154**	**135,858,888**

For the carrying value of cash pledged to secure the borrowings please refer to Note 14.

9. PREPAYMENTS

As of December 31, 2022 the Group has prepayments in amount of RON 11,826,587 (RON 8,030,713 as of December 31, 2021). The prepayments balance as of December 31, 2022 and December 31, 2021 consists mainly of deferred commissions for financing related to the Club loan for undrawn facilities and other amounts such as insurance policies for professionals and tangible assets.

10. TRADE AND OTHER PAYABLES

	December 31, 2022	January 1, 2022
Suppliers	281,384,001	197,070,870
Fixed assets suppliers	48,347,315	22,723,765
Advances paid by customers (contract liabilities)	5,625,426	4,447,683
TOTAL	**335,356,742**	**224,242,318**

The balance of the suppliers account consist of debts for the acquisition of consumables, materials and commodities. Fixed assets suppliers account consists of debts for the acquisition of medical equipment.

11. OTHER LIABILITIES

	December 31, 2022	January 1, 2022
Salary and related liabilities (incl. contributions)	24,169,661	17,305,119
Other liabilities	44,819,643	27,023,056
TOTAL	**68,989,304**	**44,328,176**

Other liabilities include the current portion of government grants of RON 2,378,369 (RON 2,020,718 as of December 31, 2021), while the non-current portion is presented as Other long term debt. Government grants have been received for the purchase of certain items of property, plant and equipment. There are no unfulfilled conditions or contingencies attached to these grants. Also, other liabilities include a deferred revenue in the amount of RON 28,827,508 (RON 10,604,820 as of December 31, 2021), which refers mainly to future income in relation with National Health Programme, in which the Group is involved.
Also, Other liabilities include other sundry creditors in the amount of RON 10,099,383 (RON 2,692,807 as of December 31, 2021). The increase during 2022 is mainly due to the amount owned by MNT Healthcare, company acquired through business combination during 2022, to its related party, MNT Bulgary EOOD (please refer to the Note for Related parties).

(all amounts are expressed in RON, unless otherwise specified)

12. PROVISIONS

	December 31, 2022	January 1, 2022
Carrying amount at start of year	7,992,337	7,209,494
Acquired through business combination	1,165,445	-
Additional provision charged to plant and equipment	-	-
Charged/(credited) to profit or loss		
- additional provisions recognised	2,153,470	2,803,850
- unused amounts reversed	-	(36,173)
Amounts used during the year	(1,527,926)	(1,984,834)
Carrying amount at end of year	**9,783,326**	**7,992,337**

Provisions booked as of 31 December 2022 and 31 December 2021 refer to provisions related to untaken holidays, which cover above 95% from total balance.

13. LEASES

Leasing facilities refer to buildings, vehicles and medical equipment.

Amounts recognised in the balance sheet

Right-of-use asset	**Buildings**	**Vehicles**	**Equipment**	**Total**

Disposals	(13,294,539)	(604,852)	(834,426)	**(14,733,817)**
Value at 31 December 2022	**351,790,125**	**25,202,895**	**103,302,774**	**480,295,794**
Accumulated depreciation				
Value at 1 January 2022	**91,133,584**	**7,733,613**	**19,053,751**	**117,920,949**
Charge for the year	48,754,966	4,239,714	9,935,549	**62,930,229**
Disposals	(6,932,857)	-	(35,915)	**(6,968,772)**
Value at 31 December 2022	**132,955,693**	**11,973,328**	**28,953,385**	**173,882,405**
Carrying amount				
At 1 January 2022	**144,253,009**	**12,936,337**	**33,526,256**	**190,715,602**
At 31 December 2022	**218,834,432**	**13,229,567**	**74,349,389**	**306,413,389**

	December 31, 2022	January 1, 2022
Non-current - Lease Liabilities	225,175,340	149,685,246
Current portion – Lease Liabilities	77,141,698	52,586,827
TOTAL	**302,317,038**	**202,272,073**

For movement during the period please refer to Note 14 where a reconciliation of cash and non-cash movements of lease liabilities is provided.

(all amounts are expressed in RON, unless otherwise specified)

Amounts recognised in the statement of profit or loss	**12 months ended December**	
	2022	**2021**
Depreciation charge of right-of-use assets	62,930,229	45,306,040
Interest expense on lease liabilities for rent contracts that fall under IFRS 16 (included in finance cost)	8,299,604	6,390,308
Covid (Gain) Foregiveness amount	-	-
PL (Gain) from contracts terminated earlier	565,862	70,621
Foreign exchange loss for rent contracts that fall under IFRS 16 in relation with Lease Liabilities	58,218	2,860,234
Expense relating to short-term leases (included in rent expenses)	595,003	715,761
Expense relating to leases of low-value assets that are not shown above as short-term leases (included in rent expenses)	1,177,428	1,076,996
Other categories	6,660,366	5,905,722

The total cash outflow for leases amount to RON 77,681,591 (2021: RON 53,044,264) for contracts that fall under IFRS 16 (which refer to rental of buildings, vehicles and equipment), out of which RON 69,381,987 refer to payments of principal and RON 8,299,604 refer to payments of interest.

Extension and termination options
Extension and termination options are only included in the lease term when the Group has the right to unilaterally extend/terminate and judges that this right is reasonably certain to be exercised. For some of the Group’s lease agreements with extension options, these criteria are considered met and the extension option is therefore included in the lease term.

Some of the real estate leases within the Group contain termination options with a purpose to achieve operational flexibility. For most of these agreements, the Group is reasonably certain that the termination option will be exercised. Consequently, the lease liability does not include future rental payments in the period after the earliest termination date.

14. NET FINANCIAL DEBT

	December 31, 2022	**January 1, 2022**
Current portion of interest-bearing loans and borrowings	83,496,070	83,948,645

Increases in credit facility during 2022
On 13 December 2022, following the approval of the General Meeting of Shareholders on 21 November 2022, MedLife, together with co-borrowers BAHTCO INVEST S.A., ACCIPIENS S.A., POLICLINICA DE DIAGNOSTIC RAPID S.A., CLINICA POLISANO S.R.L., DENT ESTET CLINIC S.A., GENESYS MEDICAL CLINIC S.R.L., CENTRUL MEDICAL SAMA S.A., VALDI MEDICA S.R.L., PHARMALIFE MED S.R.L., PRIMA MEDICAL S.R.L., ANIMA SPECIALTY MEDICAL SERVICES S.R.L., CED PHARMA S.R.L., BADEA MEDICAL S.A., CENTRUL MEDICAL MICROMEDICA S.R.L., SOLOMED CLINIC S.A., VITA CARE FLAV S.R.L., PHARMACHEM DISTRIBUTIE S.A., SANO PASS S.A., MNT ASSET MANAGEMENT S.R.L., MNT HEALTHCARE EUROPE S.R.L., SWEAT CONCEPT ONE S.A., ONCO CARD S.R.L., ONCOCARD INVEST S.R.L., DIAMED CENTER S.R.L., STEM CELLS BANK S.A. and SFATUL MEDICULUI.RO S.A., signed with Banca Comercială Română, as lead arranger, a syndicated credit facility in the total amount of 228 million euros for the refinancing and increase of the existing credit of 50.7 million euros. The bank syndicate that signed the new credit granted to the MedLife Group is comprised of Banca Comerciala Romana, as coordinator, lead arranger, documentation agent, facility and guarantee agent, and financier, Raiffeisen Bank, BRD Groupe Societe Generale, Banca Transilvania, ING Bank N.V. Amsterdam Branch Bucharest, and Erste Group Bank AG, as lead arrangers and financiers.
The syndicated credit contract involves a refinancing agreement for existing facilities, extending the financing period, rearranging terms and conditions, as well as an additional increase of 50.7 million euros, which will be in the form of a term facility, used by MedLife, along with other liquidity of the Group, for possible new acquisition opportunities on the market.
As at December 31, 2022, the Group's drawn and undrawn financing facilities included the following:

- a loan agreement and an overdraft facility agreement secured by CEC Bank S.A. and Clinica Polisano S.R.L., with an outstanding balance of RON 30,009,820 as of 31 December 2022;
- a loan agreement secured by Banca Transilvania S.A. and Ghencea Medical Center, with an outstanding balance of RON 499,817 as of 31 December 2022;
- a loan agreement secured by Banca Transilvania S.A. and Micromedica Roman S.R.L., with an outstanding balance of RON 1,051,316 as of 31 December 2022;
- two loan agreements secured by Banca Transilvania S.A. and Centrul Medical Micromedica S.R.L., with an outstanding balance of RON 1,048,207 as of 31 December 2022;
- a loan agreement secured by Raiffeisen Bank S.A. and Krondent S.R.L., with an outstanding balance of RON 62,876 as of 31 December 2022;
- a loan agreement secured by Banca Transilvania S.A. and Dent Estet Ploiesti S.R.L., with an outstanding balance of RON 2,303,156 as of 31 December 2022;
- a loan agreement and an overdraft facility agreement secured by Banca Transilvania S.A. and MNT HEALTHCARE EUROPE SRL, with an outstanding balance of RON 22,924,806 as of 31 December 2022;
- a loan agreement secured by Banca Transilvania S.A. and Life Med S.R.L., with an outstanding balance of RON 573,125 as of 31 December 2022;
- a loan agreement secured by BRD GROUPE SOCIETE GENERALE S.A. and Pro Life Clinics S.R.L., with an outstanding balance of RON 87,500 as of 31 December 2022, and a loan agreement secured by ING BANK N.V. AMSTERDAM SUCURSALA BUCURESTI and Pro Life Clinics S.R.L., with an outstanding balance of RON 458,695 as of 31 December 2022;
- a loan agreement secured by EXIM BANK S.A. and Medicris S.R.L., with an outstanding balance of RON 338,339 as of 31 December 2022;
- a loan agreement secured by ING BANK N.V. AMSTERDAM SUCURSALA BUCURESTI and Medici's S.R.L., with an outstanding balance of RON 41,170 as of 31 December 2022;

(all amounts are expressed in RON, unless otherwise specified)

- an overdraft facility agreement secured by Garanti Bank S.A. and Med Life S.A., with the amount drawn as of 31 December 2022 being RON 9,894,800;
- an overdraft facility agreement secured by Unicredit Tiriac Bank and Prima Medical S.R.L., with a maximum credit limit of RON 800,000, fully drawn as of 31 December 2022;
- an overdraft facility agreement secured by Banca Transilvania S.A. and Onco Team Diagnostic S.R.L., with an outstanding balance of RON 252,537 as of 31 December 2022;
- an overdraft facility agreement secured by Banca Transilvania S.A. and Pharmachem Distributie S.R.L., with an outstanding balance of RON 3,193,399;
- an overdraft facility agreement concluded between Banca Transilvania S.A. and Stomestet S.R.L., with an outstanding balance of RON 175,951 as of 31 December 2022.

The interest rate for each loan for each interest period is the annual rate that represents the sum of the applicable margin and, depending on the currency of each loan, EURIBOR for amounts in EUR or ROBOR for amounts in RON.

15. SHARE CAPITAL AND SHARE PREMIUM

The issued share capital in nominal terms consists of 132,870,492 ordinary shares as at 31 December 2022 (31 December 2021: 132,870,492) with a nominal value of RON 0.25 per share. The holders of ordinary shares are entitled to one vote per share in the shareholders' meetings of the Company, except for the treasury shares bought back by the Company as part of the share buy-back program. All shares rank equally and confer equal rights to the net assets of the Company, except for treasury shares.

In accordance with the Decision of the Extraordinary General Meeting of Shareholders of the Company dated 15.12.2020, the share capital of the Company was increased with RON 27,681,352.50, from RON 5,536,270.5 to RON 33,217,623, by issuance of a number of 110,725,410 new shares with a nominal value of RON 0.25 per share. The Share Capital Increase was made with the incorporation of share premium reserves, and the newly issued shares (5-for-1) were allocated without a monetary compensation to all shareholders registered in the shareholders' register of the Company as at 4 of January 2021 (Registration Date).

The effects of the share capital increase were processed on 15 of February 2021 and the newly issued shares were allocated to shareholders.

The total number of issued ordinary shares of the Company after the share capital increase was 132,870,492.

	December 31, 2022	**January 1, 2022**
Share capital	33,217,623	33,217,623
Share premium	50,594,933	49,177,468
TOTAL	**83,812,556**	**82,395,091**

During 2022 the Group reacquired own equity instruments (treasury shares) in a total amount of RON 7,851,826 and released shares in total value of RON 8,648,583, net of commissions. The difference between the fair value and cost of own shares when the change was made is in a total amount of RON 1,417,465 and was included as an increase on the share premium account.

(all amounts are expressed in RON, unless otherwise specified)

16. EARNINGS PER SHARE

Basic and diluted earnings per share

	December 31, 2022	**January 1, 2022**
Total basic and diluted earnings per share attributable to the ordinary equity holders of the company	0.24	0.77

Earnings used in calculating earnings per share:

	December 31, 2022	**January 1, 2022**
Profit attributable to the ordinary equity holders of the company used in calculating basic and diluted earnings per share	32,173,072	102,613,932

Weighted average number of shares used as the denominator

	December 31, 2022	**January 1, 2022**
Weighted average number of ordinary shares used as the denominator in calculating basic and diluted earnings per share	132,768,804	132,792,071

17. RESERVES

The structure of the Group's reserves is presented below:

	December 31, 2022	**January 1, 2022**
General reserves (i)	24,325,883	23,440,505
Other reserves (ii)	30,768,310	18,410,254
Revaluation reserves (iii)	149,497,049	95,484,740
TOTAL	**204,591,242**	**137,335,499**

(i), (ii) Legal reserves and other reserves		
Balance at beginning of the year	**41,850,759**	**28,726,817**
Movements	13,243,434	13,123,942
Balance at the end of the year	**55,094,193**	**41,850,759**
(iii) Revaluation reserves		
Balance at beginning of the year	**95,484,740**	**95,484,740**
Decrease arising revaluation correction	-	-
Increase due to revaluation	64,300,368	-
Deferred tax related to revaluation	(10,288,059)	-
Balance at the end of the year	**149,497,049**	**95,484,740**

On the General reserves account there are legal reserves registered in the amount of RON 9,033,264 (2021: RON 8,481,939). The increase of RON 885,378 in legal reserves arised as a result of the national legislation.

Other reserves have increased with RON 12,358,056 in order to re-invest the profits earned during the year.

The properties revaluation reserve arises on the revaluation of land and buildings. During 2022, the Group engaged an independent appraiser to determine the fair value for land and buildings as of 31 December 2022. The total revaluation difference that was recorded as a revaluation surplus in the statement of changes in equity is in the amount of RON 54,012,309 (excluding NCI).
When revalued land or buildings are sold or otherwise disposed of, the portion of the properties revaluation reserve that relates to that asset, and that is effectively realized, is transferred directly to general reserves.

The effects of taxes on income, if any, resulting from the revaluation of property, plant and equipment are recognized and disclosed in accordance with IAS 12 Income Taxes (please see Note 26). Deferred tax recognised on other comprehensive income as a result of revaluation of Land and Buildings is in the amount of RON 10,288,059 (excluding NCI), (please refer to Note 26).

(all amounts are expressed in RON, unless otherwise specified)

18. NON-CONTROLLING INTEREST

	December 31, 2022	January 1, 2022
Balance at beginning of year	**43,295,149**	**27,633,022**
Share of profit for the year	5,259,484	10,299,277
Share of other comprehensive income	1,673,316	-
Non-controlling interests arising on the acquisition of subsidiaries	21,895,097	7,445,708
Subsequent acquisition of NCI	(6,865,634)	(1,865,109)
Distribution of dividends	-	(217,749)
TOTAL	**65,257,412**	**43,295,149**

During 2022, the Group acquired an additional 10% of the issued shares in Almina Company, an additional 10% of the issued shares in Genesys, an additional 4% in Oncoteam Diagnostic and 30.32% in Group RMC Hungary for a total consideration of RON 16,593,813, out of which RON 6,527,676 was made in cash and RON 10,066,138 through own shares release used for acquiring additional NCI.

Immediately prior to the purchase, the carrying amount of the existing non-controlling interest in Group was 6,865,634 RON. The Group recognised a decrease in non-controlling interests of 6,865,634 RON and a decrease in equity attributable to owners of the parent of 9,728,179 RON. The effect on the equity attributable to the owners of Group during the year is summarised as follows:

	December 31, 2022	January 1, 2022
Carrying amount of non-controlling interests acquired	6,865,634	1,865,109
Consideration paid to non-controlling interests	(16,593,813)	(4,661,882)
Excess of consideration paid recognised in the transactions with non-controlling interests reserve within equity	**(9,728,179)**	**(2,796,773)**

19. REVENUE FROM CONTRACTS WITH CUSTOMERS

Revenue from customers consist of medical services, including revenues from prevention packages of corporate customers and fees for services rendered within Group's clinics and various hospitals within Romania. Please see breakdown below.

Business Line	12 months 2022 Sales	% of Total Sales	12 months 2021 Sales	% of Total Sales	Variation 2022/2021
Clinics	616,685,378	34.3%	407,035,457	28.5%	51.5%
Stomatology	119,068,495	6.6%	93,204,531	6.5%	27.7%
Hospitals	377,991,740	21.1%	317,305,322	22.2%	19.1%
Laboratories	199,919,067	11.1%	257,907,412	18.1%	-22.5%
Corporate	221,374,274	12.3%	206,070,519	14.4%	7.4%
Pharmacies	80,941,362	4.5%	59,949,420	4.2%	35.0%
Others	179,452,431	10.0%	85,745,712	6.0%	109.3%
TOTAL SALES	**1,795,432,748**	**100.0%**	**1,427,218,373**	**100%**	**25.8%**

The Group has only 25% of its sales during 2022 deriving from the treatment of NHIH insured patients. The Group has one reportable segment, healthcare services, that aggregates the operating segments clinics, stomatology, hospitals, laboratories and corporate in the total amount of RON 1,535,038,955 in 2022.

The Group obtains revenues from goods mainly from Pharmacies and Others business lines, while the other business lines generate mainly revenues from services. In the Other category there are also included revenues from processing and storage of stem cells and, starting with 2022, the wellness services.
The revenues of the Group are generated on the Romanian market, with only 1.1% from other geographical locations (Hungary). The entire amount included in contract liabilities at the beginning of the year (as per Note 10) was recorded as revenue in 2022.

During 2022, the increase for the Others revenue stream is mainly due to the intensified distribution of medicine as a result of the acquisition of Pharmachem Distributie during 2021, the company being currently consolidated considering all 12 months of activity in the profit and loss account.

(all amounts are expressed in RON, unless otherwise specified)

20. OTHER OPERATING REVENUES

	12 months 2022	12 months 2021

Please refer to Note 15 and Note 16.

(b) Executive Committee and Board of Directors' compensation

Compensations granted to the members of the Executive Committee were as follows:

	12 months 2022	12 months 2021
Executive Committee	7,953,552	7,319,579

Executive Committee compensation includes the payments toward members of the top management under their mandate contracts concluded with the Company for a period of 4 years.

As at December 31, 2022, the Company's Executive Committee consisted of ten managers remunerated based on mandate agreement. Considering the termination, by mutual agreement, of the mandate contract of Mr. Adrian Paul Lungu as MedLife CFO and member of the Executive Committee of the Company on 30 September 2022, a new Executive Committee member and CFO of the Group was appointed starting October 1st 2022, respectively Ms. Alina-Oana Irinoiu.

During the year 2022 there have been no amendments to the composition of Medlife's Board of Directors, their mandates ending December 20, 2024.

Compensations granted to the members of the Board of Directors were as follows:

	12 months 2022	12 months 2021
Board of Directors	3,828,027	3,909,013

Med Life SA Board of Directors consists of 7 members under administration agreements concluded with the Company, approved by the General Shareholders Meeting.

Members' mandate for a period of 4 years, starting December 21st, 2020 and ending December 20th, 2024. No loans were granted to managers and administrators in 2022 and 2021.

(all amounts are expressed in RON, unless otherwise specified)

- 10% subsequent acquisition of shares in Almina Trading in February 2022;
- 10% subsequent acquisition of shares in Genesys Medical Clinic in March 2022;
- Acquisition of 100% shares in Clinica Life Med, in March 2022;
- Acquisition of 60% shares in Pro Life Clinics, in April 2022;
- 4% subsequent acquisition of shares in Oncoteam Diagnostic in April 2022;
- Acquisition of 100% shares in Oncocard, in May 2022;
- Acquisition of 100% shares in Oncocard Invest, in May 2022;
- Acquisition of 100% shares in Tomorad Expert, in May 2022;
- 30.32% subsequent acquisition of shares in RMC Group in April and May 2022;
- Acquisition of 100% shares is Medicris si Triamed, in June 2022;

- Acquisition of 60% shares in IT Repair, in June 2022;
- Acquisition of 80% shares in SC M-Profilaxis SRL, in June 2022;
- Acquisition of 60% shares in Clinica Opticristal and Alinora Optimex, in July 2022;
- Acquisition of 51% shares in SanoPass, in September 2022;
- Acquisition of 60% shares in Sweat Concept gyms network, in September 2022;
- Acquisition of 80% shares in Medici's and Micro-Medic, in October 2022 (following approval by the Competition Council);
- Acquisition announcement of 99.67% shares in Muntenia Medical Competences SRL, in July 2022 (transaction approved by the Competition Council and completed in January 2023);
- Acquisition announcement of 51% shares in Provita Group, in October 2022 (approved by the Competition Council in 2023, in process of closing as at the date of this reporting).

27.1.1. Subsequent acquisition of non-controlling interest

Increased participation in Almina Trading SA
In February 2022 MedLife completed the acquisition of additional 10% shares in Almina company, reaching a 90% stake. In 2017, MedLife acquired a majority stake of 80% in Almina Trading S.R.L., a company that includes eight medical centers and two laboratories, located in Dambovita and Ilfov counties.

Increased participation in Genesys Medical Clinic
In March 2022, MedLife completed the acquisition of additional 10% shares in Genesys Group, one of the largest private medical services providers in western Romania, thus reaching a stake of 83%. Genesys has been part of MedLife System since 2011, when representatives announced the acquisition of 55% of its shares.

Increased participation in Oncoteam Diagnostic
In April 2022, MedLife completed the acquisition of additional 4% shares in Oncoteam Diagnostic, reaching a stake of 79%. Oncoteam has been part of MedLife System since 2019, when representatives announced the acquisition of 75% of its shares.

Increased participation in RMC Hungary
In April and May 2022, MedLife completed the acquisition of additional 30.32% shares in RMC Group, reaching a stake of 81.32%. RMC Group has been part of MedLife System since 2019, when representatives announced the acquisition of 51% of its shares.

27.1.2. Organic growth

Organic development - MedLife Targu Mures Hyperclinic
On June 2022, MedLife inaugurated the first large medical clinic in Targu Mures. The new multidisciplinary unit provides patients in the center and north of the country with 16 medical and surgical specialties for consultations, investigations and minor surgeries, ensuring an integrated circuit of investigation, diagnosis and treatment.

27.1.3. Acquisition of subsidiaries

Acquisition of Neolife Group

In February 2022 MedLife has completed the acquisition of 50% shares in Neolife Romania's oncology centers, following its approval by the Competition Council. Thus, MedLife Group consolidates its integrated diagnostic and oncological treatment services through the 4 Neolife medical centers in Bucharest (2), Iasi and Brasov, with other two centers in Braila and Valcea being under development.

Acquisition of Life Med

In March 2022 MedLife Group completed the acquisition of 100% shares in Clinica Life Med. The company was integrated under Sfanta Maria network.

Life Med is one of the largest private providers of outpatient medical services under contract with NHIH, covering 24 specialties. Life Med offers comprehensive diagnostic and treatment services from consultations, clinical investigations to laboratory tests for over 130,000 patients annually.

Acquisition of Pro Life

In April 2022 MedLife Group completed the acquisition of 60% shares in Pro Life Clinics; the new company was integrated under Sfanta Maria network.

Pro Life Clinics has been operating on the private medical services market in Iasi for over 13 years and offers outpatient medical services that integrate 19 medical specialties: from allergology and clinical immunology, dermatology and cardiology, to endocrinology, medical imaging, internal medicine, neurology.

Acquisition of OncoCard Hospital in Brasov

In May 2022 MedLife Group completed the acquisition of OncoCard Hospital in Brasov after the approval of the transaction by the Competition Council. This is one of the most important transactions of the first half of this year that comes to consolidate together with Neolife the area of oncology and radiotherapy, in accordance with the strategic objectives set by MedLife and announced to shareholders.

Expanding operations in the center of the Country

In May and June 2022 MedLife Group completed the acquisition of 100% shares in Tomorad Expert - Diagnostic and Imaging Medical Center from Sfantu Gheorghe and of 60% shares in the Gastroenterology Medical Center from Targu Mures, thus consolidating its position in the Center of the Country.

Acquisition of Medicris Group in Oradea

In June 2022 MedLife Group completed the acquisition of 100% shares in Medicris Oradea Group, the largest center of occupational health and related services in Bihor County, which is present for over 20 years on the private medical services market in Oradea and offers outpatient medical services that integrate 9 medical specialties: occupational health, ophthalmology, internal medicine, ENT, psychology and others.

Acquisition of Profilaxis Center in Timisoara

In June 2022 MedLife Group completed the acquisition of 80% shares in SC M-Profilaxis SRL, one of the top polyclinics in Timisoara. The company was integrated under Sfanta Maria brand, through which the network expands its presence in the western part of the country.

Profilaxis Timisoara has an experience of almost 25 years on the local market and is one of the most well-known medical operators in Timisoara, which provides patients with complete prevention and prophylaxis services. The medical unit integrates occupational health, outpatient services, day hospitalization department and an important portfolio of subscribers.

Acquisition of Opticristal Clinic in Brasov

In July 2022 MedLife Group completed the acquisition of 60% shares in Opticristal Clinic in Brasov. The transaction, carried out by Policlinica de Diagnostic Rapid (PDR), comes in addition to the medical services offered in the regional hub developed by MedLife in Brasov County, which thus reaches 16 medical units.

Acquisition of SanoPass digital platform

In September 2022 MedLife completed the acquisition of 51% shares in SanoPass digital platform, one of the most active Romanian startups in the health-tech area, which offers subscription and individual medical, wellness and fitness services. SanoPass digital platform unifies and facilitates access to health and fitness, offering access to over 1,200 private clinics, both local and large networks, and over 200 fitness rooms in Romania and the Republic of Moldova. Through this national partnership network, SanoPass provides medical and fitness services for 50,000 subscribers.

Acquisition of Sweat Concept gyms

In September 2022 MedLife completed the acquisition of 60% shares in Sweat Concept, thus marking the entry into a new line of business - wellness, which complements the complex medical services offered nationwide.

Acquisition of Medici's Group

In October 2022 MedLife completed the acquisition of 80% shares in Medici`s, the most important local medical operator in the western region. The transaction marks a strong consolidation in the western part of Romania and aims to transform Timisoara into one of the strongest regional health hubs in the next 2-3 years.

Acquisition of Muntenia Medical Competences

On 14 July 2022, MedLife announced the acquisition of 99.76% shares in Muntenia Medical Competences S.A.

The transfer of ownership of the shares held by SIF Muntenia SA in Muntenia Medical Competences S.A. was completed in 2023, after the fulfillment by both parties of conditions precedent to Closing, including the approval by the Competition Council.

Acquisition of Provita Group (transaction not closed)

On 5 October 2022, MedLife announced the acquisition of 51% shares in Provita Group. The transaction marks the consolidation of diagnostic and treatment services at the national level. In Bucharest, Provita Group is present with a multidisciplinary hospital, two imaging centers equipped with the latest technology, a laboratory where a wide range of analyzes and medical tests can be processed, as well as a pain therapy training center , the only one in Central and Eastern Europe, approved by the European Society of Regional Anesthesia and Pain Therapy. In the immediately following period, Provita will also develop in other big cities in the country, the first targeted city being Suceava where the Group will inaugurate a specialized clinic, the key areas being interventional pain therapy and complete screening for breast pathology. The transaction has been approved by the Competition Council and is in process of closing as of the date of this reporting.

27.1.4 Corporate events during 2022

Appointment of MedLife Group CFO
Considering the termination, by mutual agreement, of the mandate contract as CFO of MedLife and respectively as a member of the Executive Committee of the Company of Mr. Adrian Paul Lungu, on 30 September 2022, the Board of Directors of MedLife decided on 19 September 2022 to appoint Ms. Alina Oana Irinoiu as CFO of MedLife and member of the Company's Executive Committee, the mandate starting on 1 October 2022 and ending on 21 October 2024.

(all amounts are expressed in RON, unless otherwise specified)

Increase of the syndicated credit
On 13 December 2022, following the approval of the General Meeting of Shareholders on 21 November 2022, MedLife, together with co-borrowers BAHTCO INVEST S.A., ACCIPIENS S.A., POLICLINICA DE DIAGNOSTIC RAPID S.A., CLINICA POLISANO S.R.L., DENT ESTET CLINIC S.A., GENESYS MEDICAL CLINIC S.R.L., CENTRUL MEDICAL SAMA S.A., VALDI MEDICA S.R.L., PHARMALIFE MED S.R.L., PRIMA MEDICAL S.R.L., ANIMA SPECIALTY MEDICAL SERVICES S.R.L., CED PHARMA S.R.L., BADEA MEDICAL S.A., CENTRUL MEDICAL MICROMEDICA S.R.L., SOLOMED CLINIC S.A., VITA CARE FLAV S.R.L., PHARMACHEM DISTRIBUTIE S.A., SANO PASS S.A., MNT ASSET MANAGEMENT S.R.L., MNT HEALTHCARE EUROPE S.R.L., SWEAT CONCEPT ONE S.A., ONCO CARD S.R.L., ONCOCARD INVEST S.R.L., DIAMED CENTER S.R.L., STEM CELLS BANK S.A. and SFATUL MEDICULUI.RO S.A., signed with Banca Comercială Română, as lead arranger, a syndicated credit facility in the total amount of 228 million euros for the refinancing and increase of the existing credit of 50.7 million euros. The syndicated credit contract involves a refinancing agreement for existing facilities, extending the financing period, rearranging terms and conditions, as well as an additional increase of 50.7 million euros, which will be in the form of a term facility, used by MedLife, along with other liquidity of the Group, for possible new acquisition opportunities on the market.

27.2. Assets acquired and liabilities recognized at the date of acquisition

Assets acquired and liabilities recognized at the date of acquisition	**31 December 2022**	**1 January 2022**
Non-current assets	**260,502,085**	**46,062,887**
out of which		
- Intangible assets	*33,968,192*	*17,387,430*
- Property, plant and equipment	*122,955,304*	*11,797,464*
- Right-of-use assets	*100,382,819*	*16,796,409*
- Others	*3,195,770*	*81,585*
Current assets	**84,854,668**	**54,095,201**
out of which		
- Inventories, cash and prepayments	*28,483,576*	*18,530,185*
- Trade Receivables and other receivables	*56,371,093*	*35,565,016*
Current liabilities	**195,161,941**	**80,732,727**
out of which		
- Overdraft	*1,111,865*	*660,625*
- Current tax liabilities	*54,255*	*50,985*
- Trade and other liabilities	*90,435,201*	*59,389,415*
- Lease liabilities	*92,273,753*	*17,417,884*
- Current portion of long term debt	*37,667*	
- Provisions	*1,165,445*	*-*
- Deferred tax arising at acquisition	*10,083,756*	*3,213,819*
Non-current liabilities (Borrowings on long term)	**23,320,240**	**3,425,536**
Net assets	**126,874,572**	**15,999,825**

Tangible and intangible assets fair value valuation methodology uses a mix between the cost approach and the income approach, which estimates the depreciation of the assets considering also the economic benefits that would be generated by that particular assets. For certain medical equipment and vehicles, for which publicly available information allows, fair value was measured using market approach.

27.3. Acquisition related costs
The Group incurred acquisition-related costs of 3,165,540 RON on legal fees and due diligence costs. These costs have been included in Other operating expenses.

(all amounts are expressed in RON, unless otherwise specified)

27.4. Goodwill arising on acquisition

	2022	2022
Consideration transferred	273,972,468	60,976,906
Less: fair value of identifiable net assets acquired	(126,874,572)	(15,999,825)
Plus non-controlling interest	21,895,097	7,445,708
Goodwill arising on acquisition	**168,992,993**	**52,422,789**
Bargain gain arising on acquisition	-	-

The goodwill is attributable to the workforce and also to the know-how acquired and the high profitability of the acquired business. It will not be deductible for tax purposes.

27.5. Net cash outflow on acquisition of subsidiaries

	31 December 2022	1 January 2022
Consideration paid in cash	328,743,653	55,717,152
Less: cash and cash equivalent balances acquired at acquisition date	(12,188,904)	(3,212,417)
Total	**316,554,749**	**52,504,735**

Consideration paid in cash includes also the advanced for future business combination.

28. CAPITAL MANAGEMENT

The Group manages its capital to ensure that it will be able to continue as a going concern while maximizing the return to stakeholders through the optimization of the debt and equity balance.

The capital structure of the Group consists of debt, which includes the borrowings disclosed in Note 14, cash and cash equivalents disclosed in Note 8 and equity, comprising issued capital, reserves and retained earnings as disclosed in note 15, 16 and note 17.

The Group's risk management reviews the capital structure regularly. As a part of this review, the management considers the cost of capital and the risks associated with each class of capital. Based on recommendations of the management, the Group will balance its overall capital structure through the payment of dividends, new share issues and share buy-backs as well as the issue of new debt or the redemption of existing debt.

The Group has grown in 2022 principally through acquisitions and less through organic development. In expanding organically, the Group is exposed to potential loss of capital if the expansion or new activities do not immediately meet their financial objectives.

The Group's objectives have been to balance the cash generation from established business units into higher risk investments in new activities. This has left the equity levels of the Group as a buffer to protect the Group in case of variations in performance that could impact the established activities. The Group has used debt funding for acquisitions of businesses due to the historically low cost of debt funding and availability of liquidity on the financial markets. When assessing the adequacy of the Group's equity for the activities and exposures the Group analyses the ratio of loans payable net of cash and liquid short-term investments to total equity (including non-controlling interests), as presented in the following table:

	December 31, 2022	December 31, 2021
Interest-bearing loans and borrowings without overdraft	858,968,713	499,295,906
Cash and cash equivalents	89,068,154	135,858,888
Loans payable net of cash	769,900,559	363,437,018
Total Equity	482,038,245	381,404,558
Ratio to Loans payables net of cash to Total Equity	**0.63**	**1.05**

The medium-term aim of the Group is to keep this ratio at current levels by continuing to invest in new business development and acquisitions to maintain a balanced capital structure between debt and equity.

29. RISK MANAGEMENT

The Group's Board of Directors has the overall responsibility for the establishment and oversight of the Group's risk management framework.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. The Audit Committee is responsible for monitoring and addressing issues concerning the effectiveness and efficiency of the Group's internal controls, regulatory compliance and risk management.

In the course of its business the Group is exposed to a number of financial risks, including credit, interest rate, liquidity and foreign currency risks.
This note presents the Group's objectives, policies and processes for managing these risks and methods used to measure risks.
The central treasury function has an important role in managing the Group's financial risks with the aim to control and manage the Group's financial exposure and financial costs with a balance between risk and costs.

(a) Credit risk
Financial assets that potentially give rise to concentrations of credit risk consist principally of cash, short-term deposits, trade receivables, long-term receivables from stem cells processing and advances for acquisitions of subsidiaries.

The Group's cash equivalents and short-term deposits are placed with reputable financial institutions with a high credit rating.
Trade receivables are represented net of the allowance for expected credit losses. Credit risk with respect to trade receivables is limited due to the large number of customers comprising the Group's customer base, which consists mainly of both individuals and companies. Around 62% of the total sales are cash-based with remaining being based on issuance of invoices. The financial condition of these customers in relation to their credit standing is evaluated on an ongoing basis.

The Group has also developed certain procedures to assess legal entities as customers prior to signing contracts, aimed at providing health care packages (PPMs), and monitoring their ability to meet the payments during the course of contracts. Also, the Group has established an internal Collection department which actively monitors encashments received from customers.

Other long-term receivables for stem cells processing are represented net of the allowance for expected credit losses. Receivables were individually assessed taking into account specific information available in individual cases in order to measure credit risks. An allowance for doubtful receivables was determined for certain customers for which management assessed high credit risk.

Advances for acquisition of subsidiaries are short-term in nature and might occur in certain business combinations between signing and closing, in line with Share Purchase Agreement terms and conditions. Muntenia Medical Competences acquisition was completed in January 2023, while Provita transaction was approved by the Competition Council and is currently in process of closing as of the reporting date.

The gross carrying amounts of financial assets (before credit loss allowances) included in the statement of financial position represent the Group's maximum exposure to credit risk in relation to these assets. The Group has only 25% of its sales during 2022 deriving from the treatment of NHIH insured patients (concentration of credit risk) – reliance on major customers.

At 31 December 2022 and 31 December 2021, the Group did not consider there to be a significant concentration of credit risk. Please see Note 7 Receivables, for further details regarding credit risks of trade receivables and expected credit loss allowance, Note 5.4 Other financial assets, for further details regarding credit risks of long-term receivables for stem cells processing and expected credit loss allowance and also 3.13.1 Financial assets, for further details of accounting policies used by the Group.

(b) Interest rate risk
Interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates. The Group is exposed to interest rate risk because it borrows funds at floating interest rates. The higher risk is represented by funds borrowed in the national currency, because the interest rates are periodically repriced based on index variation.

Lease contracts concluded in the national currency are also exposed due to the above repricing process, as the discount rate in this case is linked to the internal borrowing rates for funds withdrawn in the national currency.

Interest rate sensitivity analysis
The sensitivity analysis below has been determined based on the exposure to interest rates for interest bearing financial instruments at the reporting date. Out of the total outstanding balances for both borrowings and leases only the amounts that refers to the Club loan and a significant part of the total lease contracts (which refer to rent of buildings, equipment and vehicles) have been considered for the sensitivity on interest rate computation. These amounts which were included in the analysis cover more than 80% of the total outstanding balances for each category, borrowings and leases.

A 10% percent increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates. The assumptions used have not changed from previous years.

(all amounts are expressed in RON, unless otherwise specified)

If interest rates had been 10% per cent higher and all other variables were held constant, the Group's profit for the year ended 31 December 2022 would decrease by RON 3,983,637 RON (2021: decrease with RON 1,330,043). This is mainly attributable to the Group's exposure to interest rates on its borrowings and leases.

Amounts exposed to interest rate risk

LIABILITIES	Total	Out of which included in the sensitivity analysis		%	Interest expenses per year at the current interest rate for the selected portion	Interest expenses per year at the interest rate increased by 10% for the selected portion	Variation that affects the profit and loss account when the interest rate increases by 10%
2022							
Overdraft	27,801,016						
Short-Term and Long-Term portions of loans	858,968,713	Club loan	816,408,338	92%	21,580,386	23,738,425	2,158,039
Short-Term and Long-Term portions of leases	302,317,038	Contracts that refer to rent of buildings, equipment and which fall under IFRS 16	245,389,824	81%	7,661,018	9,486,616	1,825,598
2021							
Overdraft	25,493,223						
Short-Term and Long-Term portions of loans	499,295,906	Club loan	468,391,291	89%	13,983,946	14,816,432	832,486
Short-Term and Long-Term portions of leases	202,272,073	Contracts that refer to rent of buildings, equipment and which fall under IFRS 16	171,919,151	85%	5,691,557	6,192,114	500,557

	December 31, 2021	January 1, 2021
Profit or loss	3,983,637	1,333,043

(c) Liquidity risk

Ultimate responsibility for liquidity risk management rests with the board of directors, which has built an appropriate liquidity risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The following table details the Group's remaining contractual maturity for financial liabilities as of December 31, 2022 and December 31, 2021. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The table includes both interest and principal cash flows.

(all amounts are expressed in RON, unless otherwise specified)

2022

	Weighted average effective interest	Carrying amount	Total	Year 1	Year 2	Year 3	Year 4	Year 5	> Year 5
Non-interest bearing instruments									
Trade payables		**335,356,742**	**335,356,742**	335,356,742	-	-	-	-	-

(all amounts are expressed in RON, unless otherwise specified)

(d) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's operating activities (when revenue or expense is denominated in a foreign currency).

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the reporting date are as follows:

2022	RON	1 EUR = 4.9474 RON	100 HUF = 1.2354 RON	Total
ASSETS				
Cash and cash equivalents	79,669,747	9,344,717	53,690	89,068,154
Trade receivables	220,266,093	-	1,092,767	221,358,860
Financial assets	48,924,440	33,886,264	98,832	82,810,704
LIABILITIES				
Trade payables	325,697,092	8,153,765	1,505,885	335,356,742
Overdraft	17,906,216	9,894,800	-	27,801,016
Other long term debt	6,771,077	-	-	6,771,077
Short-Term and Long-Term portions of loans	23,008,547	835,960,166	-	858,968,713
Short-Term and Long-Term portions of leases	4,355,210	297,173,479	788,349	302,317,038

2021	RON	1 EUR = 4.9481 RON	100 HUF = 1.3391 RON	Total
ASSETS				
Cash and cash equivalents	130,202,261	3,326,181	2,330,445	135,858,888
Trade receivables	139,393,284	-	962,954	140,356,238
Financial assets	1,237,250	30,373,336	-	31,610,586
LIABILITIES				
Trade payables	210,414,824	11,080,404	2,747,090	224,242,318
Overdraft	15,597,023	9,896,200	-	25,493,223
Other long term debt	7,546,394	-	-	7,546,394
Short-Term and Long-Term portions of loans	154,021,386	345,274,520	-	499,295,906
Short-Term and Long-Term portions of leases	10,184,074	190,968,433	1,119,566	202,272,073

The Group is mainly exposed in respect of the exchange rate of the RON versus EUR. The below table details the Group's sensitivity to a 10% increase and decrease in RON against EUR. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates.

If EUR is weakening 10% against RON, the profit will increase and the amount stated below will be positive. For a 10% strengthening of EUR against RON there would be an equal and opposite impact on the profit and other equity, and the balances below would be negative.

The assumptions used have not changed from previous years. The variation below is presented as absolute amounts.

	December 31, 2022	**January 1, 2022**
Profit or loss	110,795,123	52,352,004

(e) Climate change risk

The Group is subject to transitional and physical risks related to climate change. Transitional risks include, for example, a disorderly global transition away from fossil fuels that may result in increased energy prices; customer preference for low or no-carbon providers of medical services; stakeholder pressure to decarbonize assets; or new legal or regulatory requirements that result in new or expanded carbon pricing, taxes, restrictions on greenhouse gas emissions, and increased greenhouse gas disclosure and transparency. These risks could increase operating costs, including the cost of the Group's electricity and energy use, or other compliance costs.

The Group monitors energy consumption relative to area and to the type of activity carried out in each location. The main consumption is in respect of natural gas, electricity and fuel, and the main sources of consumption are: air conditioning system, MRI machines and other large imaging machines (radiotherapy, radiology, angiography, CT and PET-CT).

Also, the Group is concerned with the reduction energy consumption through implementation energy efficiency measures. Over time Medlife Group has implemented technology LED used in 99% of the cases. Halls of surgery within hospitals and not only, were equipped with devices that allow LED lighting and effective point settings have been implemented from an energy point of view for heating, ventilation and air conditioning, thus reducing the energy used. LED lighting is also used in elevators and areas waiting for patients. Currently, a set of intelligent control measures are implemented at the level of consumers of various types of energy (thermal, electrical, etc.), renewal cooling aggregates (chillers), 2 installations being replaced so far. The possibility of using photovoltaic panels is also considered for the future.
In terms of GHG emissions, the Group has the legal obligation to report these emissions, the main source of generation being thermal power plants powered by gas, followed by emissions generated by the leased car fleet.
Physical risks to Group's operations include water stress; wildfires; extreme temperatures and storms, which could impact the pharmaceutical distribution, increase costs, or disrupt supply chains of medicines for patients on a global level, which also could further affect the pharmacy segment.

To carry out the activities Medlife Group consumes water that is captured exclusively from the public network. The Group monitors water consumption monthly, and through internal work procedures ensures that any risk of biological contamination of the water spilled is eliminated.

Our supply chain is likely subject to these same transitional and physical risks and would likely pass along any increased costs to us.
The improvement of the corporate governance framework is continued. At the basis of this improvement stands the materiality analysis performed by MedLife Group through a complex process consisting of several stages, as follows: identification and prioritization of stakeholders - which allowed us to better understand who we affect and who can influence our work, identify and analyze best practices in the global and national health sector, consult with the most significant internal and external stakeholders and prioritize sustainability issues in terms of the impact of our activities on the environment, stakeholder expectations about how we manage environment issues, as well as the sustainability risks that can affect our position and the development of our business.
As at 31 December 2022 the Group does not anticipate that these risks will have a material financial impact in the near term.

(f) Ongoing military conflict

The crisis started in February 2022 and was generated by the invasion of Russia in Ukraine, which led to a sharp increase in energy prices, both in Romania and in other European countries. The invasion created a refugee crisis with the fastest growth in Europe and a global food crisis. At the same time, at the regional level, a resource crisis was created due to the imposition of a series of restrictions on the international level, Russia being an important player in the natural gas market in Europe. Continued and/or intensified disruptions in Russian commodity flows to Europe could result in further increases in European energy prices.

Medlife Group does not own subsidiaries and affiliated entities on the territory of Ukraine, nor does it have any other relevant exposures in the countries directly involved in this conflict. From an operational point of view, the purchases of energy and natural gas are mainly made from the domestic market; availability, provenance and delivery of resources could be influenced by the dynamics of the conflict from region.

The consequences of the ongoing conflict in Ukraine, the European energy crisis and resulting regulatory measures and other economic disruptions currently being observed, and further regulatory interventions, as well as the extent and duration of their economic impact cannot be reliably estimated at this stage. The Group is responding to the situation with targeted measures to safeguard its economic stability. Because events are ongoing, the long-term impact can affect cash flows and profitability. However, at the date of these financial statements, the geopolitical context driven by the ongoing conflict in Ukraine has no significant negative impact on the consolidated financial statements as of December 31, 2022

(g) Macroeconomic environment

Global and regional economic conditions, respectively the economic context at national and regional international level that may negatively influence the Group's activity refer to factors such as: inflation, recession, changes in fiscal and monetary policy, tighter lending, higher interest rates, new or rising tariffs, currency fluctuations, raw material price (electricity, natural gas), etc.

The last quarter of 2022 was further marked by the spillover effects of the ongoing war in Ukraine and by the persistent inflationary pressures that reached a significant level both globally and locally, in the context of a global economic slowdown.

On the local level, the latest figures on the dynamics of Romania's GDP have shown an economic growth of 4.8% in 2022, marked by a slowdown in consumption, but with an accelerated investment component.
From the unemployment rate point of view, Romania ended 2022 with an unemployment rate of 5.6% and approx.. 10,000 fewer unemployed than a year ago, supporting that the labor market remains robust. Inflation has remained at a particularly high level of 16.4% in December and expectations are that it will return to a downward trend from the beginning of next year. However, over the medium term, inflation is likely to remain significantly above the central bank's target level, which will continue to put pressure on the monetary policy.

To continue the efforts to temper further price increases, the Board of Governors of the NBR decided in the meetings of October and November new increases in the monetary policy rate, ending the fourth quarter with a key rate of 6.25%. However, given the current level of inflation and the current uncertainties in the economy, further increases in the monetary policy rate are expected. The EUR/RON exchange rate registered a slight increase in the fourth quarter of the year, fluctuating, on average, around the 4.92 level.

The Group's income or the value of its holdings can be affected by the particular movements in the global financial markets. As a result of the higher interest rates resulting on the market during 2022, the discount rates used in the impairment tests have increased, compared with the previous year (between 8.4% and 18.0% compared with the prior year, between 8.6% and 12%). However, as a result of the sensitivity analysis performed, the Group considers that it has sufficient headroom in case of a potential increase above these numbers, with no material impact on the financial statements.

Also, the revaluation process held at the end of 2022 on all owned Land and Buildings, which generated an overall surplus at the Group level, brings sufficient confidence over the value of the assets held, being stated at their current fair value in these consolidated financial statements.

The Group revises quarterly its sensitivities to interest rates and foreign currency fluctuations. At the date of these financial statements, the Group considers that the impact of these changes would not affect the ability as a going concern, with appropriate measures undertaken in order to reduce any potential risks.

30. FAIR VALUE OF FINANCIAL INSTRUMENTS

Financial instruments in the balance sheet include trade receivables and other receivables, cash and cash equivalents, short-term and long-term loans and trade and other payables. These are presented at amortised cost. The estimated fair values of these instruments approximate their carrying amounts, largely due to the short term maturities of these instruments, except for loans.

The carrying amount of loans approximate their fair value considering the refinancing of the syndicated loan signed in 2022, in which all the credit facilities were re-arranged in terms of both maturities and interest rates. The syndicated loan covers around 92% of the total Group debt position exposure.

Financial instruments that are not held at fair value
At level 1 of the fair value hierarchy, the Group classified cash and cash equivalents as assets that are not held at fair value.

At level 3 of the fair value hierarchy, the Group classified in the category of assets: trade and other receivables, other financial assets, and in the category of debt: loans from banks and other financial institutions, leasing debts, trade payables and other financial liabilities.

The following table shows the fair value and the fair value hierarchy for assets and liabilities that are not measured at fair value in the statement of financial position as at 31 December 2022:

(all amounts are expressed in RON, unless otherwise specified)

ASSETS	**Classification under IFRS 9**	**Carrying amount**	**Fair value**	**Level 1**	**Level 2**	**Level 3**
Cash and cash equivalents	Amortized cost	89,068,154	89,068,154	89,068,154	-	-
Trade Receivables	Amortized cost	221,358,860	221,358,860	-	-	221,358,860
Other financial assets	Amortized cost	82,810,704	82,810,704	-	-	82,810,704
LIABILITIES						
Trade and other payables	Amortized cost	335,356,742	335,356,742	-	-	335,356,742
Overdraft	Amortized cost	27,801,016	27,801,016	-	-	27,801,016
Other long term debt	Amortized cost	6,771,077	6,771,077	-	-	6,771,077
Lease liability	Amortized cost	302,317,038	302,317,038	-	-	302,317,038
Long term debt	Amortized cost	858,968,713	858,968,713	-	-	858,968,713

Recognized fair value measurements

Fair value hierarchy
This note explains the judgements and estimates made in determining the fair values of the non-financial assets that are recognized and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its non-financial assets and liabilities into the three levels prescribed under the accounting standards. An explanation of each level is provided in note 3.28.

31 December 2022	**Note**	**Level 1**	**Level 2**	**Level 3**
Land and buildings	5	-	-	415,917,021

31 December 2021	**Note**	**Level 1**	**Level 2**	**Level 3**
Land and buildings	5	-	-	300,475,116

Starting with the year 2022, the Group has classified the investments in rented buildings along the line of leasehold improvements; they are held at amortized cost.

There were no transfers between levels during the year.
- Valuation techniques used to determine level 3 fair values are presented in note 5.
- Valuation inputs and relationships to fair value are presented in note 4 on the Goodwill impairment section and note 5 on the Land and buildings carried at fair value and intangibles with indefinite useful life section.

31. COMMITMENTS AND CONTINGENCIES

Contingent liabilities are not recognized in the consolidated financial statements. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is probable. A contingent asset is not recognized in the consolidated financial statements but disclosed when an inflow of economic benefits is probable.

Club loan related commitments
Med Life SA shall not enter into any agreement which will amend, novate, modify or vary the provisions of Med Life's Shareholders' Agreement without the prior written consent of the lenders.

Other commitments
As at December 31, 2022 and December 31, 2021, the Group holds insurance policies to cover possible liabilities towards doctors for malpractice as well as insurance contracts related to buildings and medical equipment.

In conformity with the concluded agreement with the National House of Health Insurance, the Group has to provide primary medical services to National House's insured citizens.

BCR issued letters of warranties in the favour of Med Life S.A. in amount of RON 9,554,521 out of which in EUR 91,309 as of December 31, 2022 (December 31, 2021: RON 1,887,804, equivalent of EUR 110,182).

In relation with business combinations and further acquisition of companies, on 4 October 2022 the Group signed the sale-purchase agreement with Ovidiu Nicolae Palea, Ada Palea and Nicolae Palea regarding the acquisition of 51% shares in Centrul de Diagnostic si Tratament Provita SRL also known as Nord Group. The transaction was approved by the Competition Council and the closing process is currently ongoing as of the date of this reporting.

Fiscal environment
The taxation system in Romania is still developing and is subject to various interpretations and constant changes, which may sometimes be retroactive. Although the actual tax due for a transaction may be minimum, delay interests may be

(all amounts are expressed in RON, unless otherwise specified)

significant, as they can be calculated at the value of the transaction and at a rate of 0.02% per day (interest) and 0.01% (penalties) per day.

In Romania the statute of limitation for tax controls (audits) is of 5 years. During 2021, the ultimate parent of the Group had a tax control which covered period from 2016 to 2020. The control was finalised during 2021 and the results were booked in accounting, the impact on the figures being RON 1,153,649. Management believes that the tax obligations included in these financial statements are adequate.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The Group measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

Transfer pricing
The fiscal legislation from Romania includes the "market value" principle, according to which the transactions between related parties have to be performed at the market value. The local tax payers, who carry transactions with related parties, have to prepare and make available to the tax authorities from Romania, at their written request, the transfer pricing documentation file. If the companies do not prepare the documentation or they present an incomplete transfer pricing file may attract penalties for non-conformity, and additionally to the information presented in the transfer pricing file, the fiscal authorities may have a different interpretation of the transactions and the circumstances compared to the management's assessment and, as a result, they may impose additional fiscal obligations as a result of adjusting transfer prices. The management of the Group is confident that, if required, they will submit the necessary information in due time to the fiscal authorities.

Litigation
The Group is involved in various litigations as part of normal course of business. Management has assessed the legal status together with the Group's legal advisors and all necessary adjustments have been recorded in the consolidated financial statements.

32. FEES TO AUDITORS

Starting with 2021, the auditor of the Group is Ernst & Young Assurance Services SRL.
The fee for the audit services of the consolidated financial statements as of December 31, 2022 of the Group prepared in accordance with IFRS as adopted by EU and the individual financial statements as of December 31, 2022 of Med Life SA prepared in accordance with IFRS in line with the provisions of Ministry of Finance Order number 2844/2016, as well as the audit services of the other individual financial statements of subsidiaries prepared in accordance with the provisions of Ministry of Finance Order number 1802/2014 was EUR 292,775 excluding VAT and other expenses.

The fee for other non-audit services performed in 2022 (in accordance with ISRS 4400) was EUR 18,525, excluding VAT.

33. EVENTS AFTER THE BALANCE SHEET DATE

Completion of the acquisition of Muntenia Hospital
On 10 January 2023, MedLife announced the completion of the transaction to take over 99.76% of Muntenia Hospital shares, the largest hospital in Arges county, after the approval of the Competition Council.

Organic growth - MedLife Deva Hyperclinic
MedLife continued its expansion plans at the national level through organic development with the inauguration, in January 2023, of the largest medical clinic in the Municipality of Deva. The newest hyperclinic covers an area of 1,000 square meters and is the result of an investment of approximately EUR 2.7 million.

These financial statements, comprising the consolidated statement of financial position, the consolidated statement of comprehensive income, the consolidated statement of changes in equity, the consolidated statement of cash flows and notes, were approved on March 27, 2022.
