HEALTH HAS A NEW DESTINATION:

MedLife Romania

High Medical Standards ■ Fast Problem Solving ■ Reasonable Costs

| The most trusted Romanian Brand for 5 consecutive years

MedLife is the most trusted company in the private medical field in Romania.

The 18 years of experience and hard work brought MedLife the awards Most Trusted Brand for 5 consecutive years and SuperBrand.

But awards are not that important, what is important is what is behind them. Less waiting time, constant investment in the medical equipment and in our doctors' training, impeccable medical act, comfortable experience and nonetheless reasonable prices.

These are the promises that MedLife keeps and this is how we are building the most important component of our medical system: the respect of the 2 millions of patients who cross our threshold every year.

Find out more about MedLife.

WHO WE ARE

Moreover, day by day, we are building the most important component of our medical system: the trust of millions of people.

MedLife Romania is a leader in private medical services on the local market.

Totalizing 18 years of activity, we pride ourselves in owning a sound and stable business, integrating all the services in a healthy medical system – from clinical and paraclinical investigations to hospitalization services and complex surgical interventions.

The 9 clinics, 8 laboratories, 6 hospitals, 3 maternity centers, 10 centers of excellence and 7 pharmacies that we are taking pride in at the level of the entire country constitute the MedLife Medical System.

Thus, the entire MedLife Medical System provides:

Complete services of diagnosis and treatment

Examinations, clinical and laboratory investigations, imagery, surgical interventions and medical recovery services, both for adults, and for children, and any family member may benefit from a safe and quality medical act.

Proven medical expertise

We are reuniting over 1,300 doctors, professors, lecturers, doctors in medical

sciences, covering a wide variety of medical and surgical specializations.

Safety of a quick and accurate diagnosis

Last generation medical equipment, constant investments in retechnologization, international quality accreditations, ISO 9001 (services and management), 15189 (medical laboratory), 14001 (environment).

Awards and Recognitions

Market research carried out by specialized research companies nominated MedLife as the brand with the biggest notoriety in all the segments: private hospital, clinic-medical center, medical laboratory.

Trusted Brand

MedLife has been designated the most trusted brand for the category "Private Clinic" for 5 years in a row, during the "Trusted Brand" study, made by Reader's Digest magazine. The study is considered to be one of the most important market studies in Europe, being carried out in 12 European countries.

SuperBrand

MedLife has been designated "Superbrand" for two consecutive editions.

MEDLIFE FACILITIES

MedLife Hyperclinics Integrated medical services

MedLife hyperclinics include all the medical specializations, providing in one single place examinations, imagery investigations and medical tests. Present in Bucharest, as well in other large cities such as Brasov, Arad and Timisoara, the hyperclinics reunite over 1300 doctors with national and international expertise and provide high performance imagery investigations: radiology, DEXA, CT, MRI 3T, 2D-4D ultrasound, mammography.

MedLife Hospitals Surgery at international standards

MedLife hospitals cover a wide range of medical and surgical specializations, reuniting the best medical staff, with experience accumulated in the most important hospitals in the country and abroad.

MedLife Laboratories Health under the microscope

MedLife has a network of 8 laboratories in Bucharest and in the country, providing a complete range of tests with the support of the newest technologies, provided by internationally recognized manufacturers such as Abbott, Roche, Siemens and others. Moreover, the laboratory network has joined partnership with Cerba Laboratory of France, and it also owns the most complex Center of Genetics and Molecular Biology in the Romanian private medical system.

MedLife Maternities Specialists in birthdays

The 3 MedLife maternities of Bucharest, Arad and Brasov, provide natural births, C-section birth facilities, as well as water births. The MedLife network of maternities welcomed to the world over 13,000 new-born babies. Bucharest MedLife Maternity has been accredited as Child-Friendly Hospital by the World Health Organization (WHO) and UNICEF, MedLife Maternity being at the same time the first private maternity in the capital city owning this status.

Life Memorial Hospital

It reunites, on the area of 1400 sqm, a modern operating unit formed out of 6 operating rooms, as well as various departments: Anesthesia and Intense Care (AIC), Surgical Specializations, Obstetrics-Gynecology (including the Neonatology section) and Medical Specializations (Internal Medicine, Cardiology, Oncology, Hematology, Diabetes and Nutrition, Medical Recovery and Balneology). The hospital has its own medical test laboratory, high performance imagery (radiology, DEXA, CT, MRI 3T, laboratory of digestive endoscopy), as well as an integrated ambulatory where all the medical specializations may be accessed.

MedLife Hospital of Orthopedics and Plastic Surgery

It is the first private hospital in Romania which has a complete capacity of diagnosis and treatment of locomotory illnesses, and plastic and reparatory surgery services.

We are using the best implants and materials, adapted for each specific case. We are providing examinations and treatments in the ambulatory, imagery and radiology, as well as a wide range of surgical interventions.

The hospital also includes the **Oncoplastic Surgery Center**, dedicated to the diagnosis, treatment and reconstruction of breasts after mastectomy, encouraging the early discovery of mammary cancer and treating it from incipient stages.

MedLife Pediatrics Hospital

It is **the first private hospital completely dedicated to children**. The Intensive Care Unit (ICU) has complete equipment, in compliance with the international standards, and at the imagery department may be performed ultrasound examinations, radiological examinations, as well as computerized tomographies.

At MedLife, in its 18 years of activity, over 1 000 000 children were treated in the ambulatory and hospital area.

WHY MEDLIFE INTERNATIONAL?

The results, awards, recognition and trust that the patients give to us day by day and not lastly the statute of leader in the private health in Romania motivates us to be better and more competitive in achieving our objectives.

This is why we believe that everything we have accomplished so far in the 18

years of experience, at the local level in Romania, recommends us to extend our services on the international market as well.

Thus the benefits provided by MedLife International are:

Good prices

At MedLife, our patients are in the center of everything that we do, and we wish to satisfy as much as possible all their requests. We know that, among other things, the price is also very important when making a purchasing decision; this is why we commit ourselves to offer fair and advantageous prices for our services, together with a good quality of the medical act.

Reduced waiting time

We are submitting all efforts for your surgery to be scheduled very shortly after the medical evaluation, so that you may regain your health very quickly and return to your habitual life style.

Highly trained doctors with international experience and training:

We are reuniting over 1,300 doctors covering a wide range of medical and surgical specializations. The professionalism, kindness and dedication of the medical staff come to add to the expertise owned by the MedLife specialists.

Irreproachable quality of the medical act:

Our objective is to satisfy the most exigent and complex medical requests, we are dedicating all our resources to provide best quality medical services for each patient. And our patients are more than satisfied: 2 million patients cross our threshold every year, and 70% of the patients come to MedLife on the recommendation of other patients.

Ultimate generation technology:

At MedLife, we are constantly investing in retechnologization, so that we may put at the service of our doctors and patients modern medical equipment, both for laboratory investigations and imagery – equipment of hematology, immunology, DNA sequencing by means of the Illumina technology, MRI, CT, DEXA osteodensitometry or MRI 3Tesla, and for the operating rooms – last generation laparoscopy and endoscopy lines.

High comfort

MedLife patients enjoy impeccable conditions of safety and comfort, friendly spaces and private rooms where they feel confident and safe, so that their recovery could be quick.

SPECIALIZATIONS FOR INTERNATIONAL PATIENTS

1. SURGERY

Our surgeons approach a varied and complex pathology, focusing on the safety of the operating act, as well as on the patients' quick recovery. Moreover, the surgical procedures and the technical equipment are permanently adapted to the international standards.

To undergo a surgical treatment in a hospital reuniting numerous medical and surgical specializations has multiple advantages:

- multidisciplinary approach of complex cases,
- competent medical surveillance 24 hours out of 24 by on-call lines,
- numerous possibilities of paraclinical investigation (laboratory tests, radiological examinations, ultrasound, CT), as well as recovery at the physiokinetic therapy department.

Plastic Surgery

Plastic, esthetic and reconstructive surgery certainly is the most fascinating surgical field, in permanent expansion, since it welcomes our wishes to improve our physical aspect, to ameliorate the effects of time passage, and to correct certain imperfections or functional deficits. The team of plastic surgeons approaches a wide range of surgical and non-surgical procedures meant to make us more beautiful.

Interventions

- ▶ Immediate/ late/ post-mastectomy breast reconstructions;
- ▶ Rhinoplasty;
- ▶ Rhinoseptoplasty;
- ▶ Abdominoplasty;
- ▶ Facial lifting;
- ▶ Cruroplasty;
- ▶ Blepharoplasty;
- ▶ Otoplasty;
- ▶ Breast enlargement;
- ▶ Liposuction;
- ▶ Mastopexy;
- ▶ Mammary reduction.

Orthopedics Surgery

MedLife International reunites a team of specialists highly trained in the diagnosis and illnesses of the locomotory apparatus, in a hospital organized according to the European standards in terms of medical protocols, comfort and equipment – Hospital of Orthopedics and Plastic Surgery.

We are offering modern methods of diagnosis and treatment, but also an agreeable space where the patient may feel comfortable and confident.

The professionalism, kindness and dedication of the medical and auxiliary staff complete the patient's positive

experience. Here, any intervention is adapted to the type of illness, to the patient's living manner and habits. We are using the best implants and materials, suitable with the patient's needs.

Interventions

- ▶ Hip prosthesis;
- ▶ Knee prostheses;
- ▶ Arthroscopies;
- ▶ Ligamentoplasties;
- ▶ Meniscectomy;
- ▶ Surgery of bunions.
- ▶ Disc hernias;
- ▶ Cervical hernias;
- ▶ Lumbar hernias;
- ▶ Kyphosis;
- ▶ Scoliosis;
- ▶ Deformities of the spine.

Spinal Surgery Interventions

Pediatric Surgery

Pediatrics is one of the medical specializations that have established us as the most important private medical service provider in Romania.

Children's anatomy is different from adults' one, which is why it requires special care and attention. We know this, and we regard each surgery as an entire process, each step of it being treated with professionalism, so that the little ones may benefit from a most pleasurable experience.

Due to the modern operating unit, our pediatric surgery section covers a wide range of complex interventions from various surgical fields, by classical or laparoscopic approach. The Intense Care Section (ICS) of MedLife Pediatric Hospital is fully equipped, in compliance with the European standards.

We are the first private hospital in Romania which has the capacity to make all the laparoscopic and endurological surgical interventions on children – for these purposes, we are using a last-generation Karl Storz HD endoscopic surgery equipment.

Pediatric Surgery Interventions

- Classical pediatric laparoscopic surgery: appendectomies, inguinal and umbilical hernias, intussusceptions, orchidopexies, intestinal tumors.

Pediatric Urology Interventions

- Renal tumors;
- Hydronephrosis;
- Reimplantations of ureters;
- Treatment of the vesicoureteral reflux;
- Hypospadias, reconstructions of urethra.

General Surgery

- Laparoscopic surgery of the abdominal wall: inguinal hernias, umbilical hernias, epigastric hernias, white line hernias, post-incisional hernias (eventrations);
- Digestive oncologic surgery: gastric, colon-rectal, liver tumors (primary and secondary), pancreatic tumors;
- Biliary and biliary way surgery: lithiasis of biliary way, biliary lithiasis, mechanical jaundices (benign and malignant);
- Breast oncologic surgery: sectorectomy, lymphadenectomies, excisions of sentinel ganglions, mastectomies (with or without reconstruction in the same operating time);
- Surgery of the thyroid gland: total thyroidectomy, hemithyroidectomy, parathyroidectomy.

Gynecologic Surgery

- Gynecologic oncologic surgery: ovary tumors, uterus tumors, tumors of the endometrium, of the cervix;
- Gynecologic laparoscopic surgery: benign and malignant illnesses of the genital apparatus (ovary cysts, uterine fibroid, the aforementioned tumors).

ENT Surgery

- Surgery of the ear: tympanoplasties, otomastoidites, miringoplasties;
- Rhinosinus surgery.

Urologic Surgery

- Urologic endoscopic surgery: cystoscopy, uroteroscopy, TURV, TURP;
- Urologic oncologic surgery: renal, prostatic and bladder tumors;
- Urethra malformation surgery: hypospadias, reconstruction of the urethra.

Oncology and Oncologic Surgery

- Chemotherapy;
- Oncologic surgical treatment: gastric tumors, colon-rectal tumors, liver tumors, pancreatic tumors, ovary tumors, tumors of the endometrium, tumors of the cervix, renal tumors, prostatic and bladder tumors, breast tumors.

2. Maternal fetal medicine and assisted human reproduction

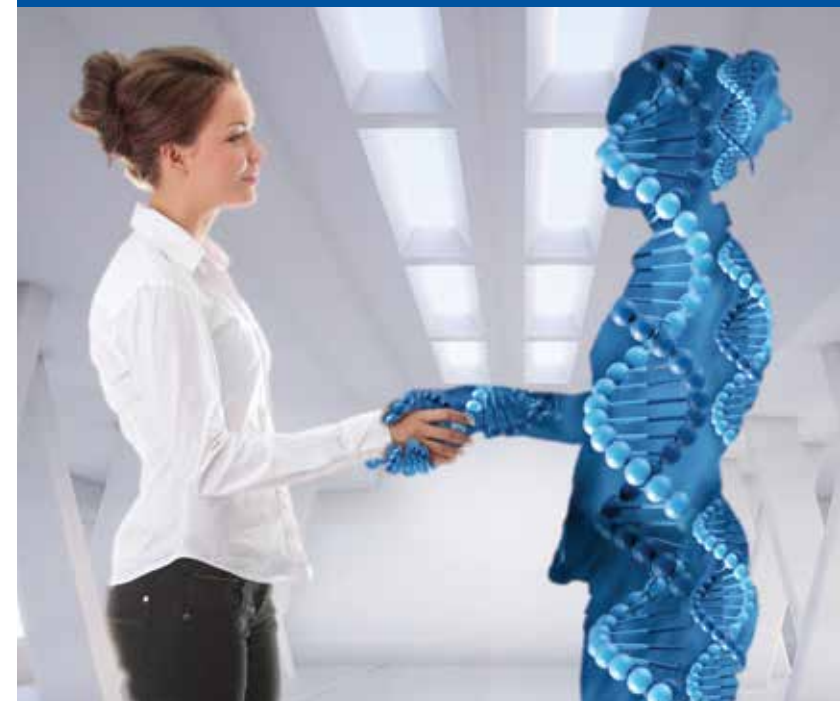

The Assisted Human Reproduction is the first integrated service of Reproductive Medicine in Romania which includes a team of specialists in assisted human reproduction, reproductive surgery, reproductive endocrinology, embryology, andrology, genetics, psychology and urology. They have diagnosed and already treated over 1500 infertile couples, with a success rate of 35% for in vitro fertilization procedures.

The center for Assisted Human Reproduction of Medlife stands out by: creation of the first service of andrology, possibility to perform in vitro fertilization with ICSI in patients with obstructive azoospermia by testicular puncture, preimplantation genetic diagnosis, approaching of patients with recurrent abortions.

Types of Procedures

- Artificial insemination
- In vitro fertilization (IVF)
- ICSI (Intracytoplasmic sperm injection)

3. Genetics and Molecular Biology „MedLife Genetics” Center

Medical Genetics deals with discovering genetic anomalies and it operates strictly in close connection with the assisted human reproduction. In 2013, we opened the Center of Genetics and Molecular Biology „MedLife Genetics”, the most complex center of genetics and molecular biology in Romania, becoming pioneers in personalized medicine and in preventive medicine.

We are offering the largest portfolio of tests of genetics and molecular biology:

- Genetic predisposition tests (test of predisposition to 42 common diseases – unique in Romania);
- Tests of oncogenetics;
- Pharmacogenetics;
- Tests to diagnose thrombophilias;
- Tests to identify mutations involved in genetic diseases;
- Tests for prenatal diagnosis;
- Infertility tests, paternity tests;
- Tests to diagnose the infectious agents.

We are using a technology which is unique in Romania: the last generation sequencer from Illumina, providing very accurate and precise results. We are offering the possibility to personalize tests.

4. Screening packages

Because it is better to discover the illnesses in time, before they start to manifest, MedLife International has created for you the screening packages adjusted for age and sex category. The packages offer you: Clinical evaluation, Laboratory investigations, Imaginary investigations.
